

As a leader...

... in power solutions and services

Caterpillar is here to help you ...

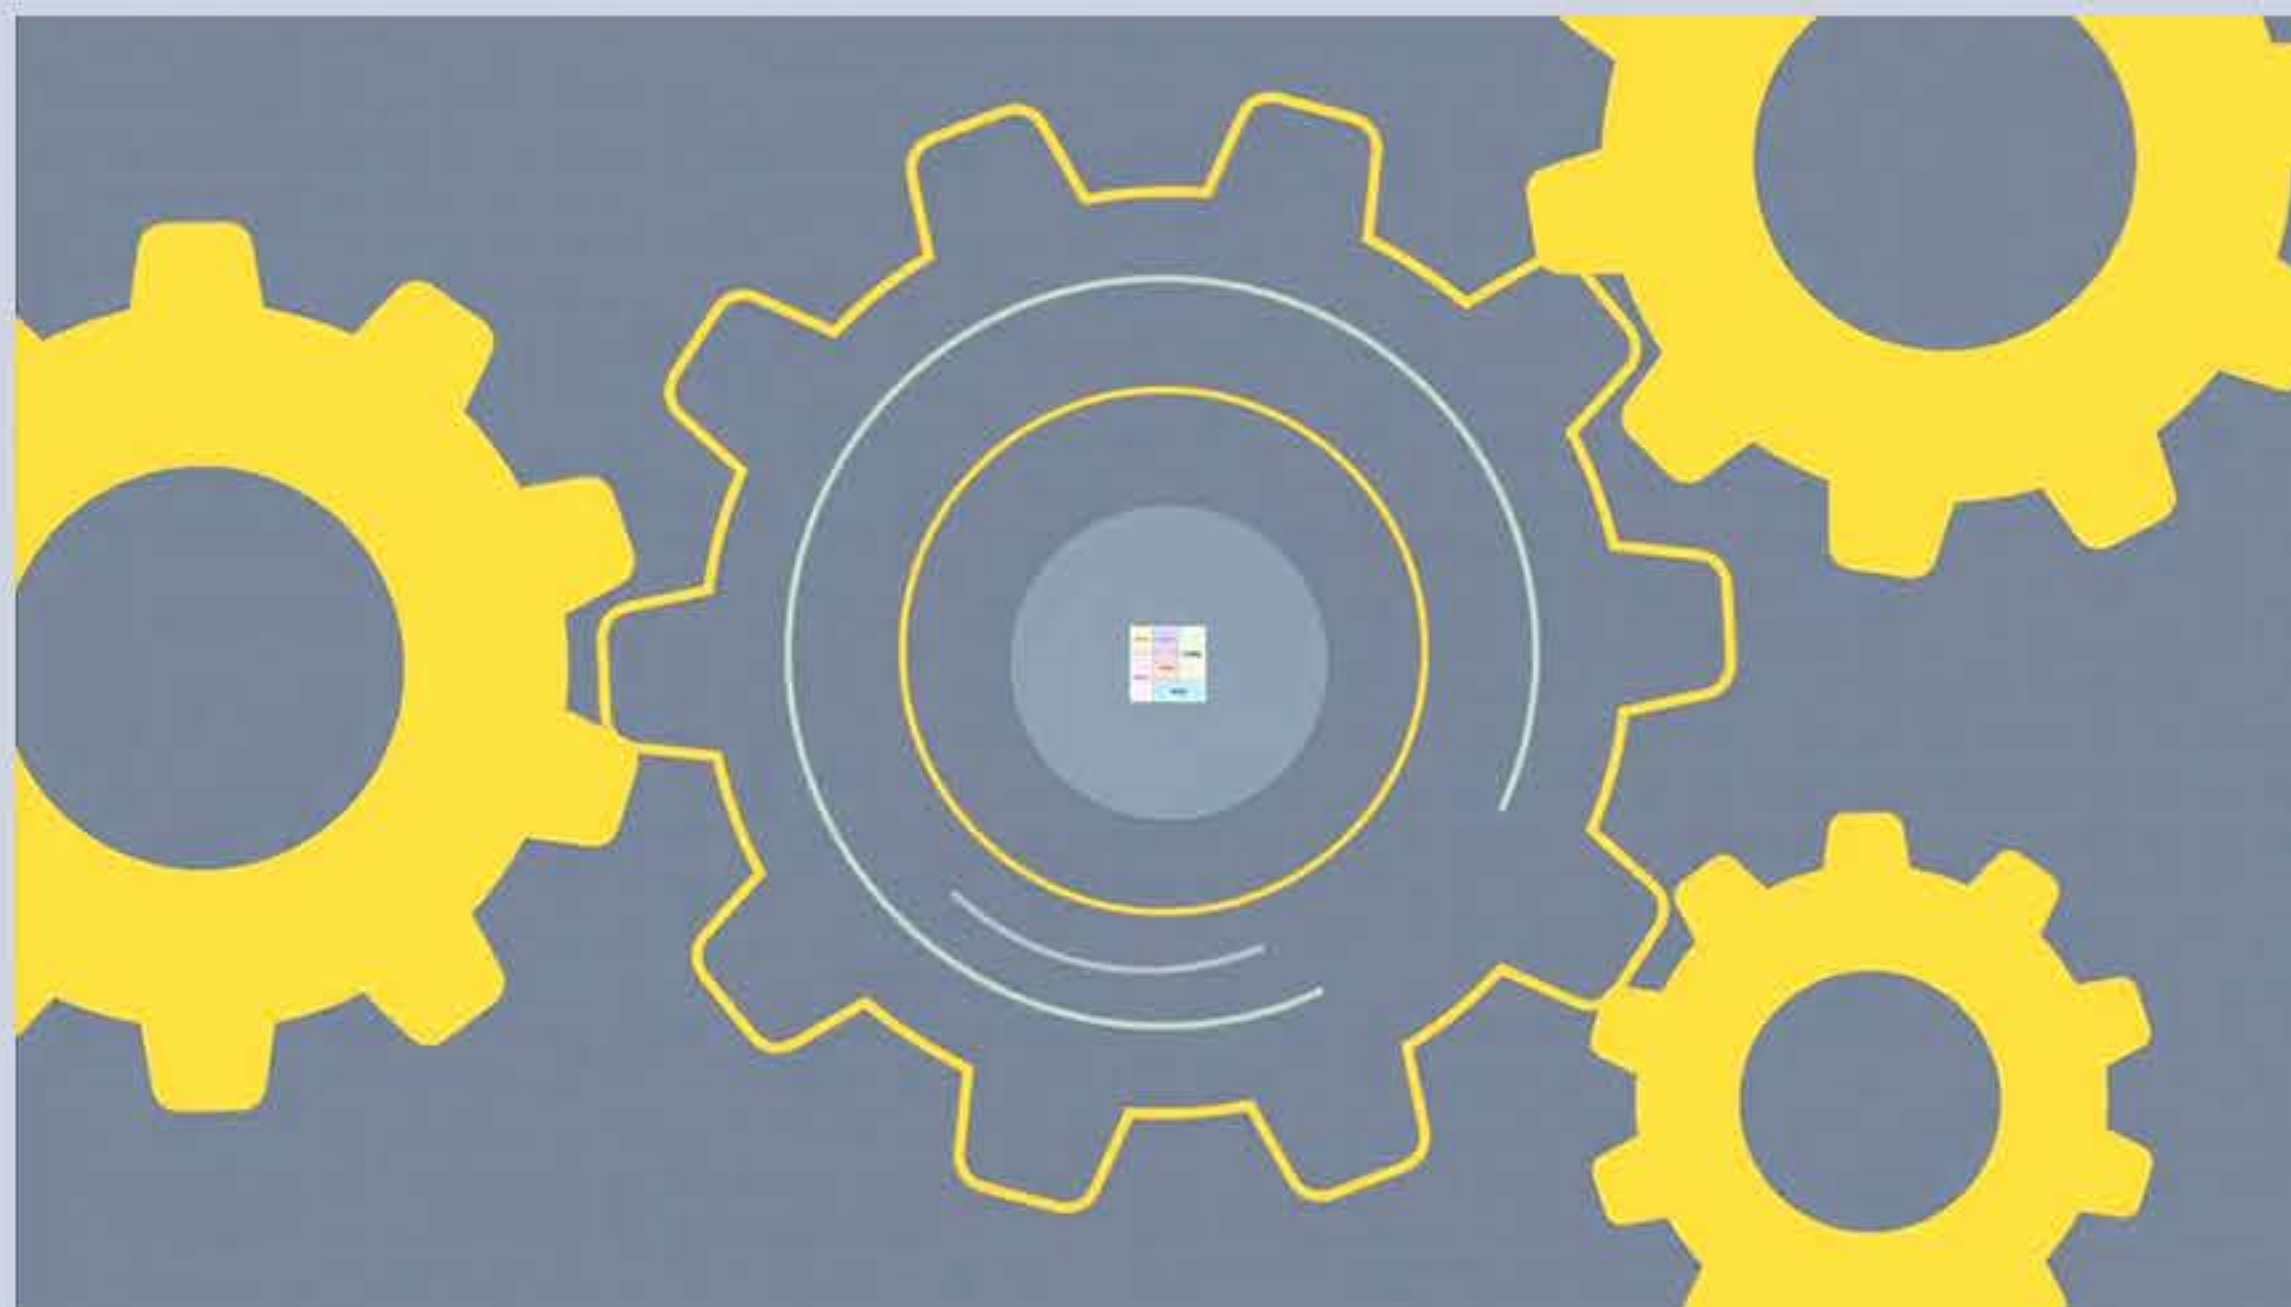

...navigate the energy transition.

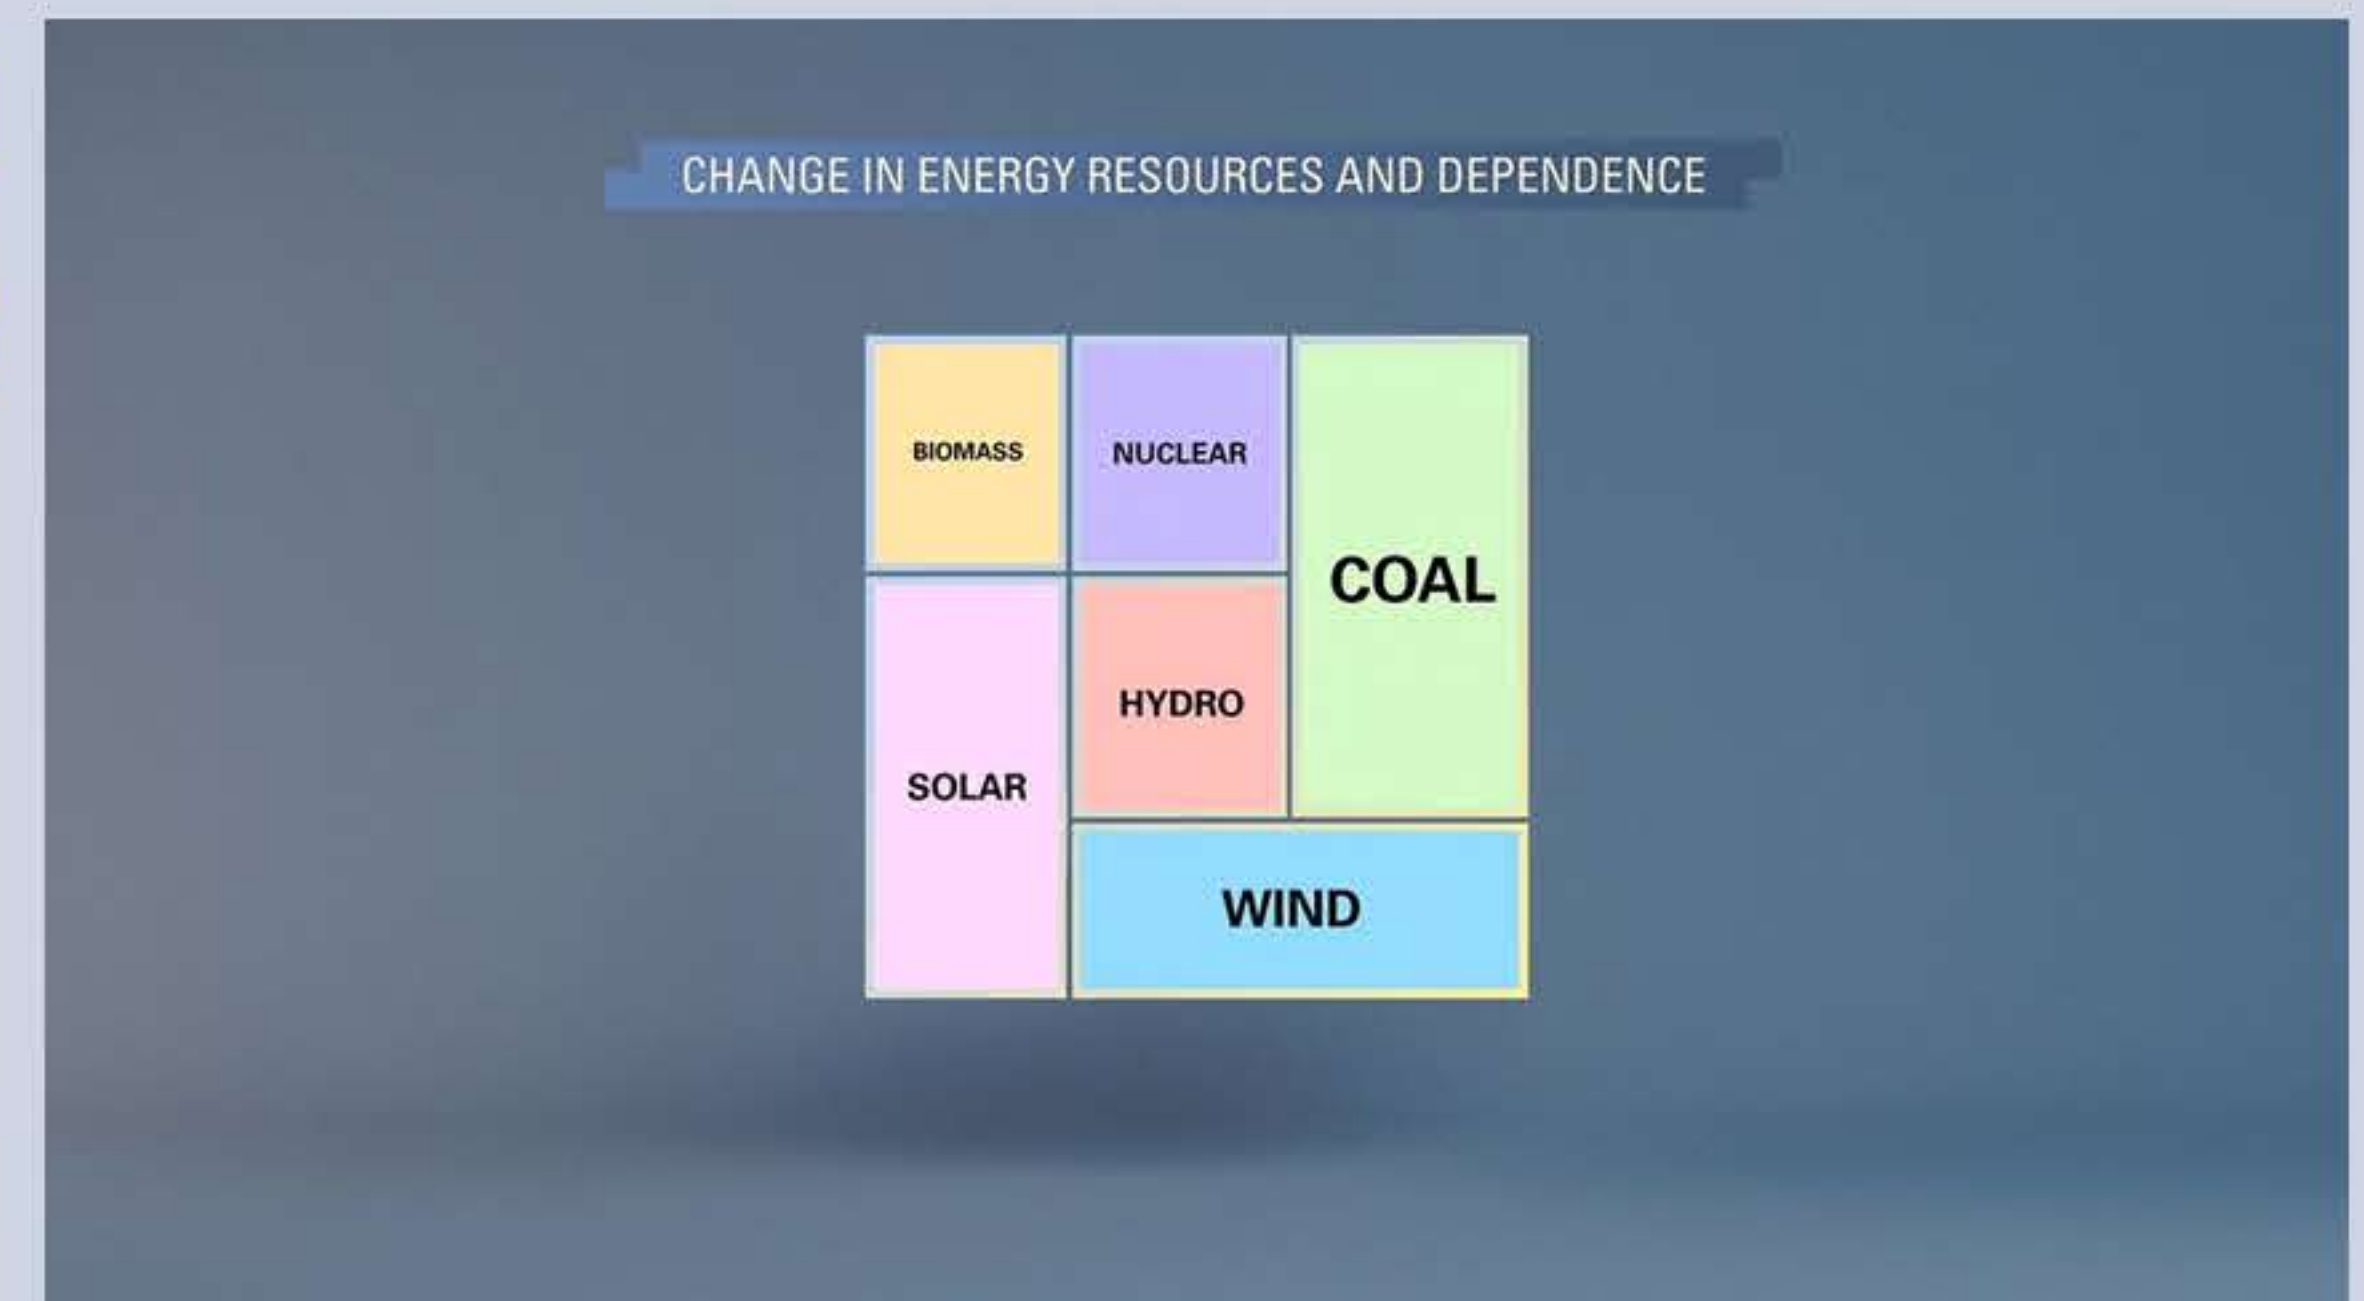

As our customers strive to achieve environmental and business sustainability,...

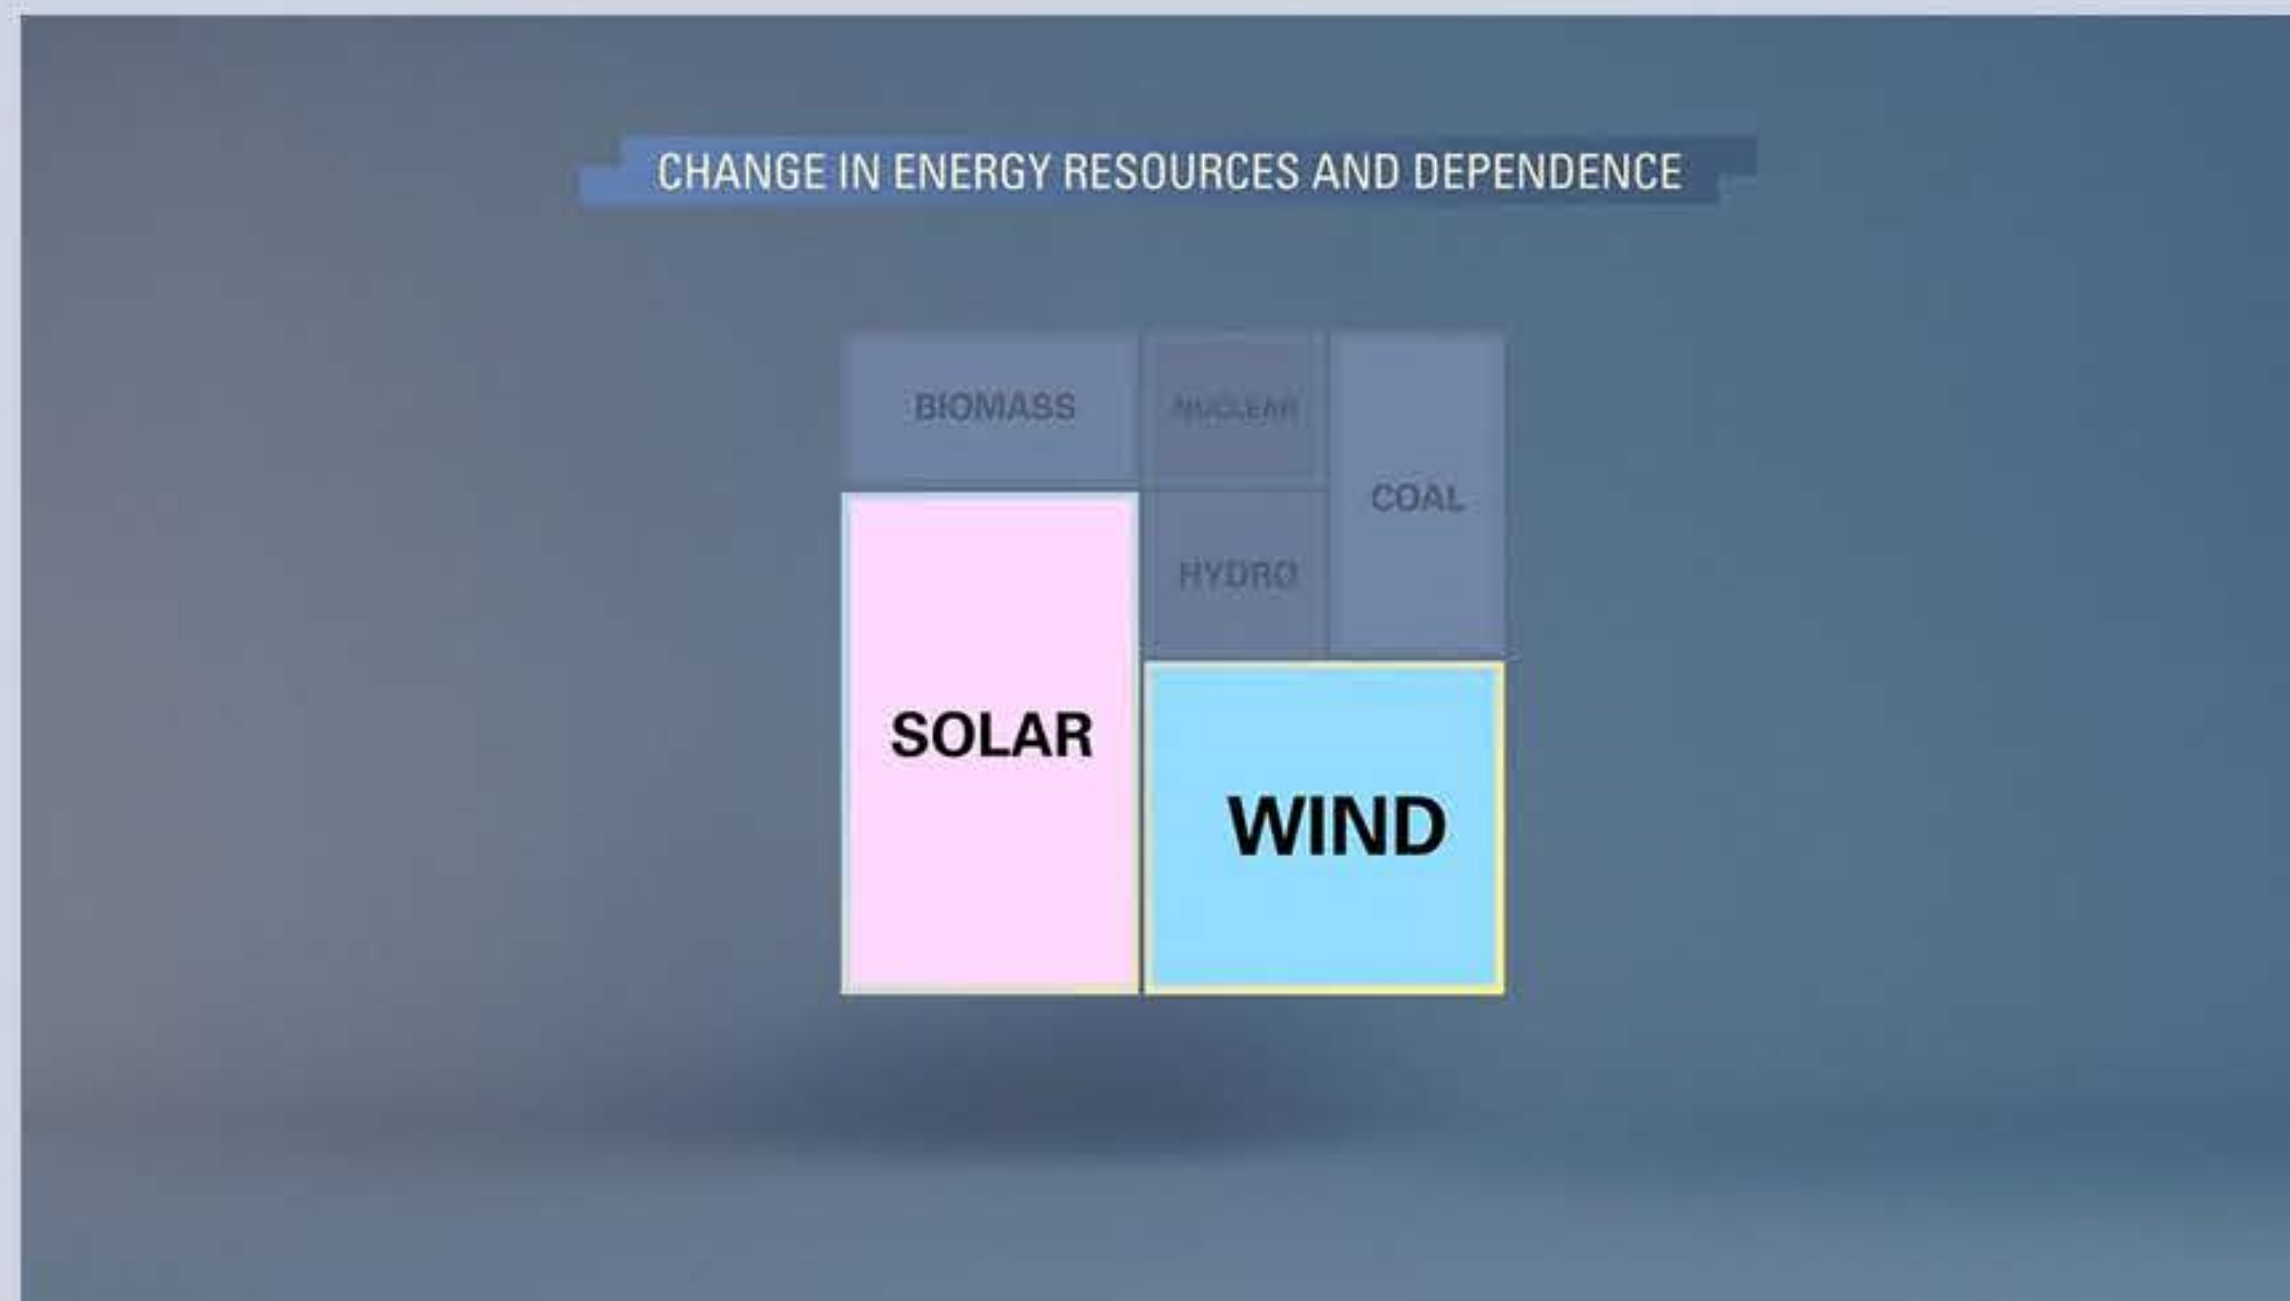

...we are working alongside them...

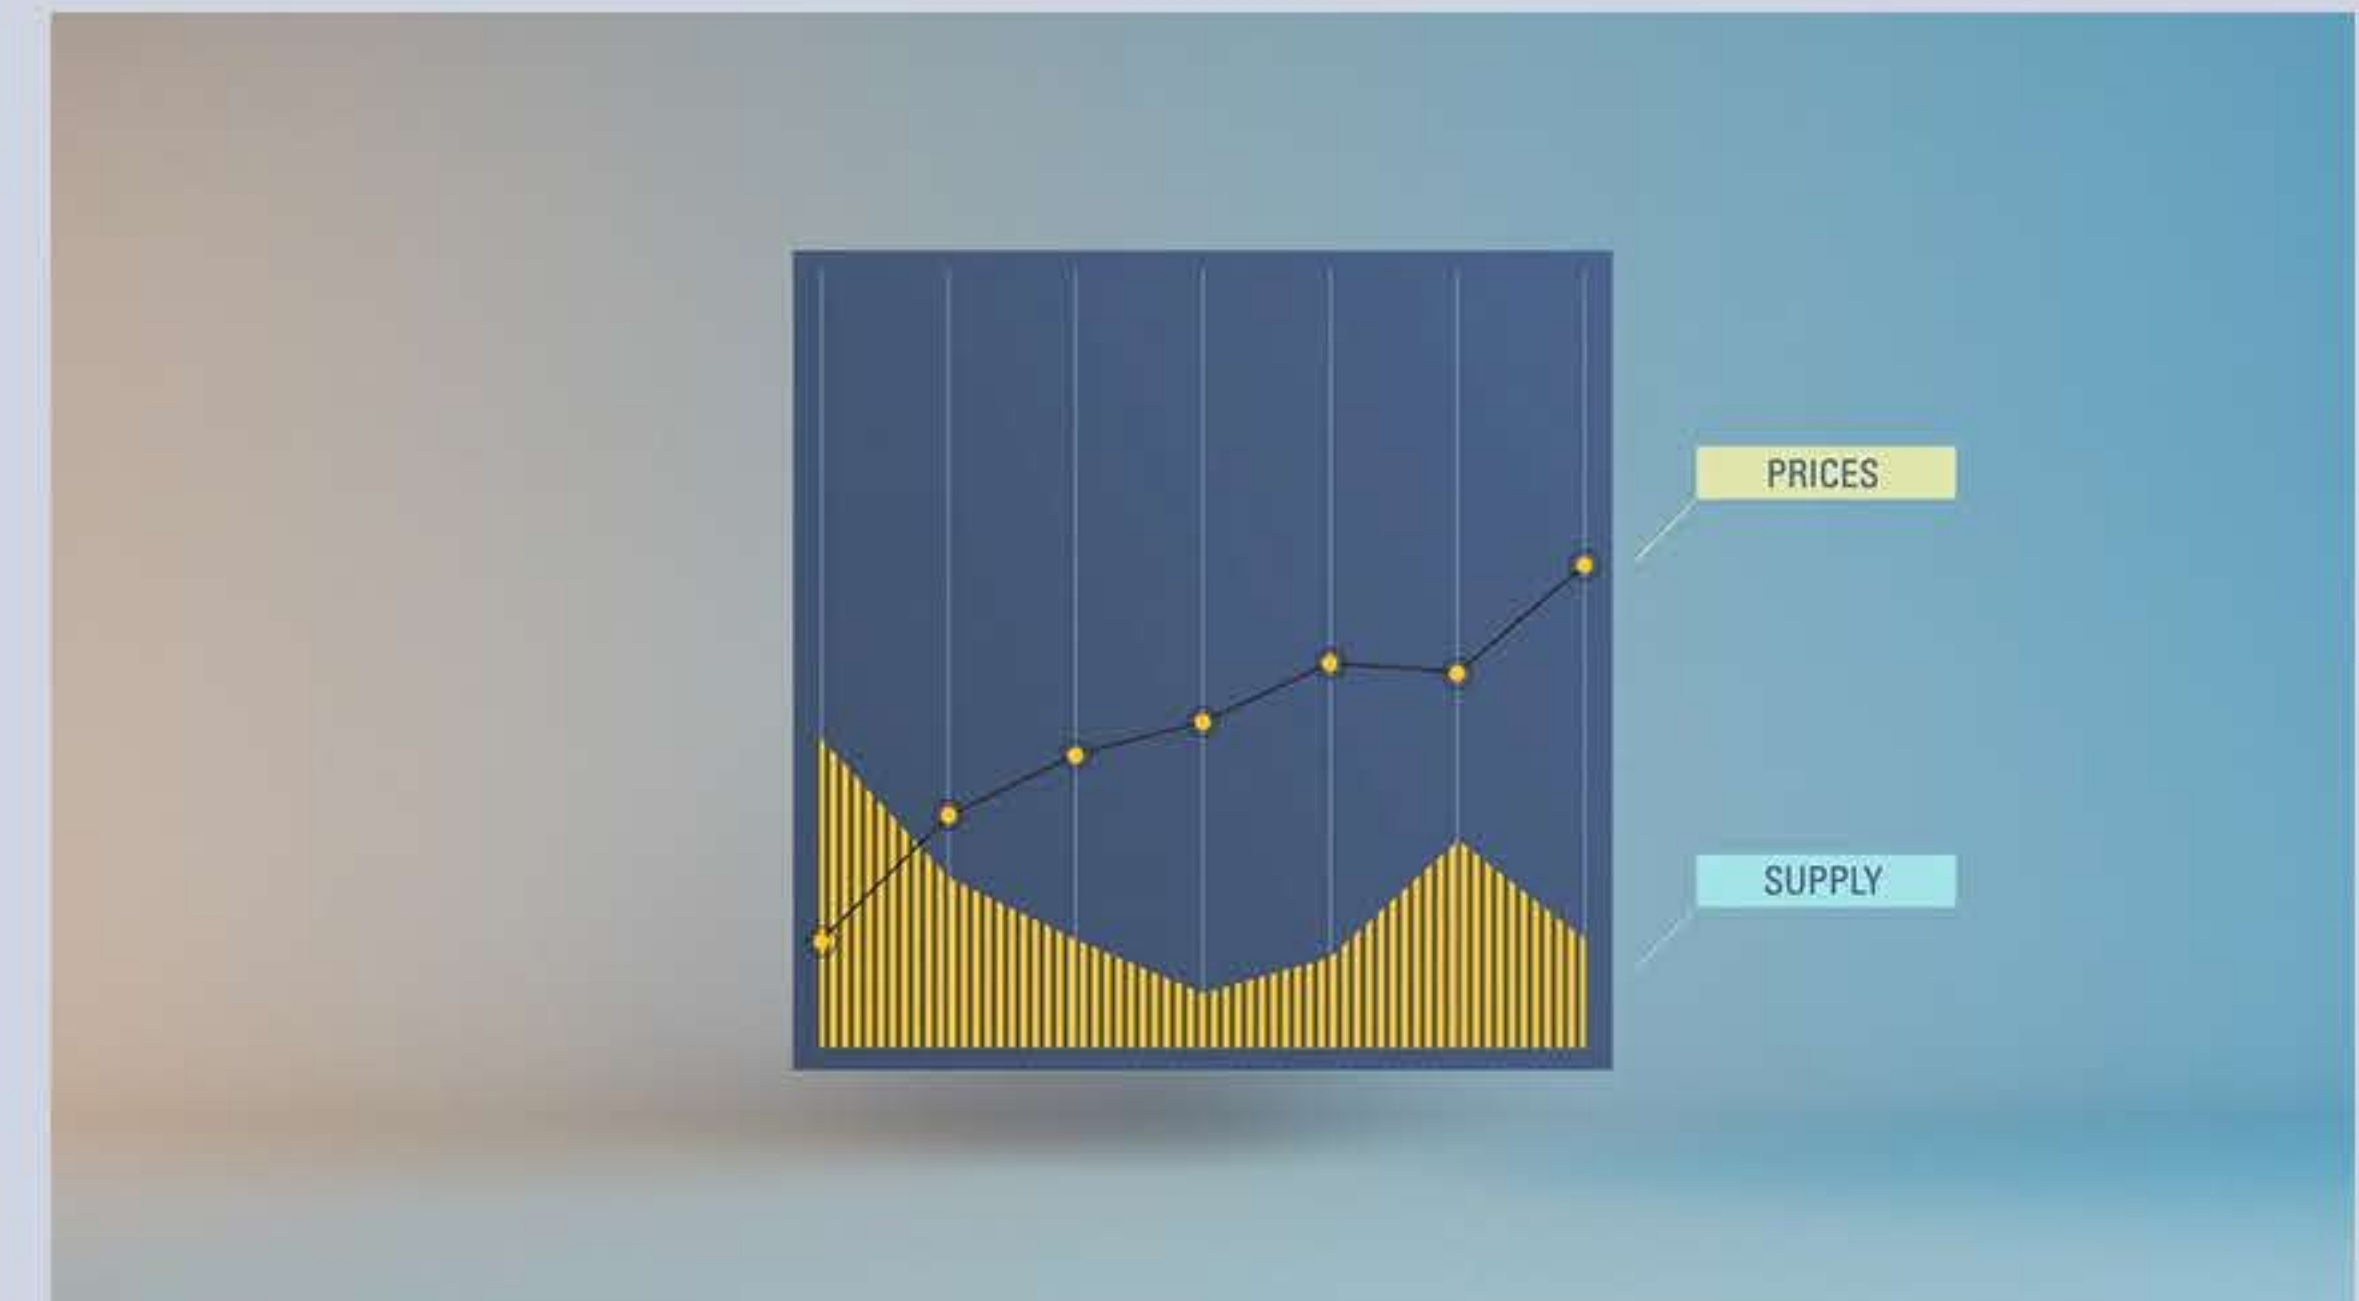

...engineering solutions to tackle their toughest challenges.

The change in power generation resources and dependence on wind and solar...

...has created swings...,

...in energy prices and supply ...

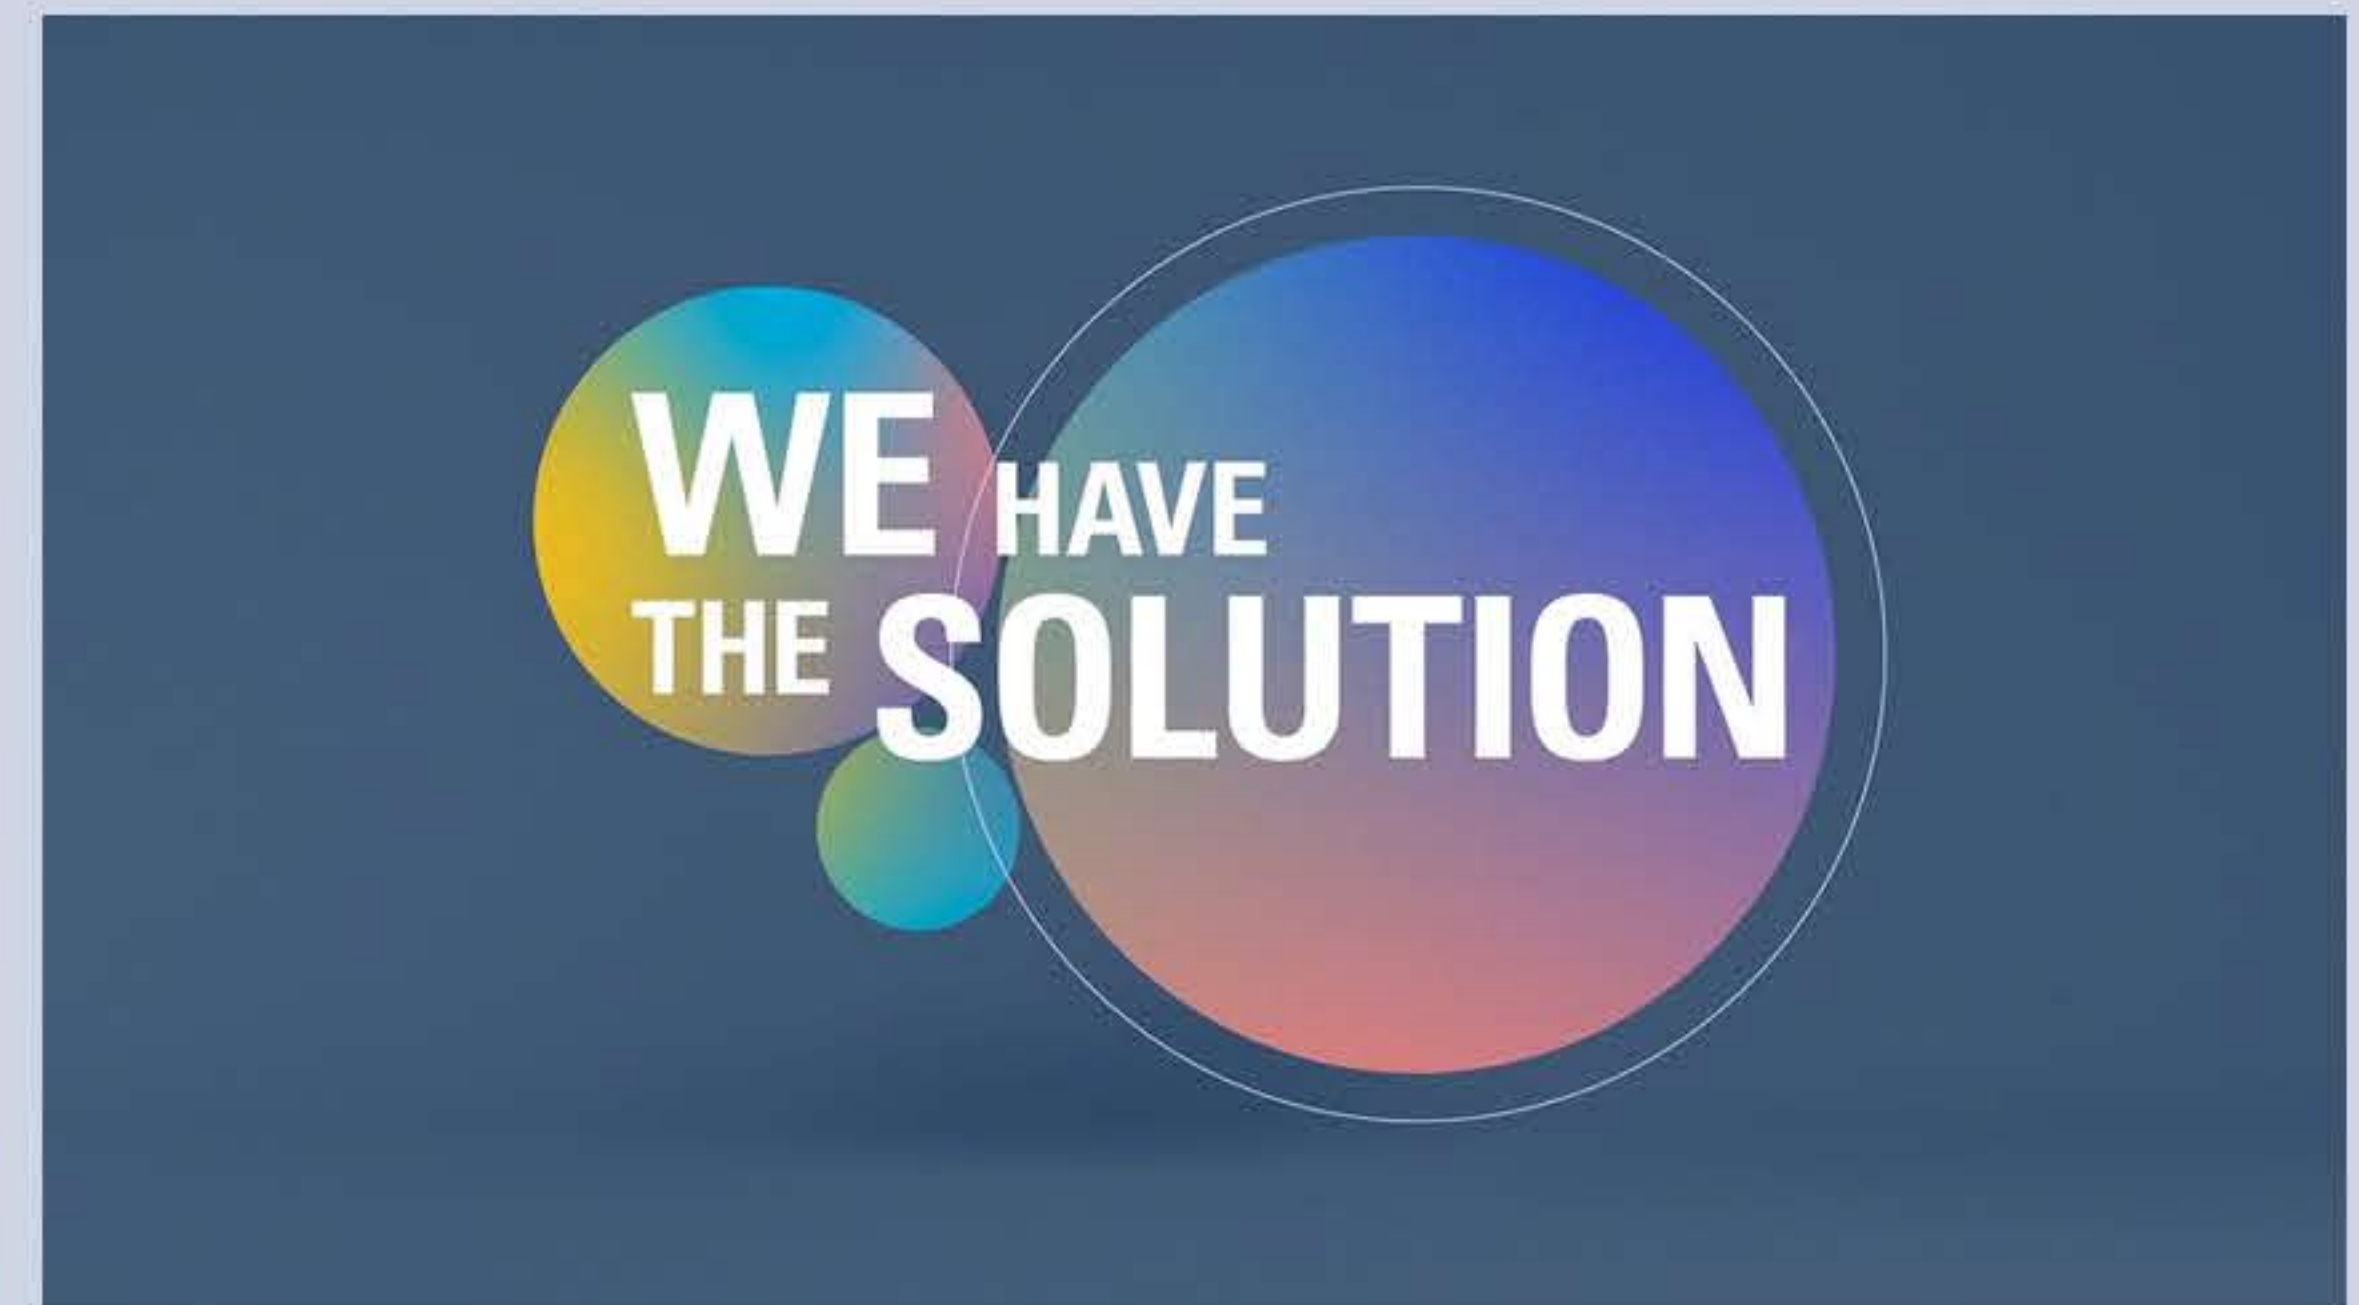

...just when customers are moving toward electrification.

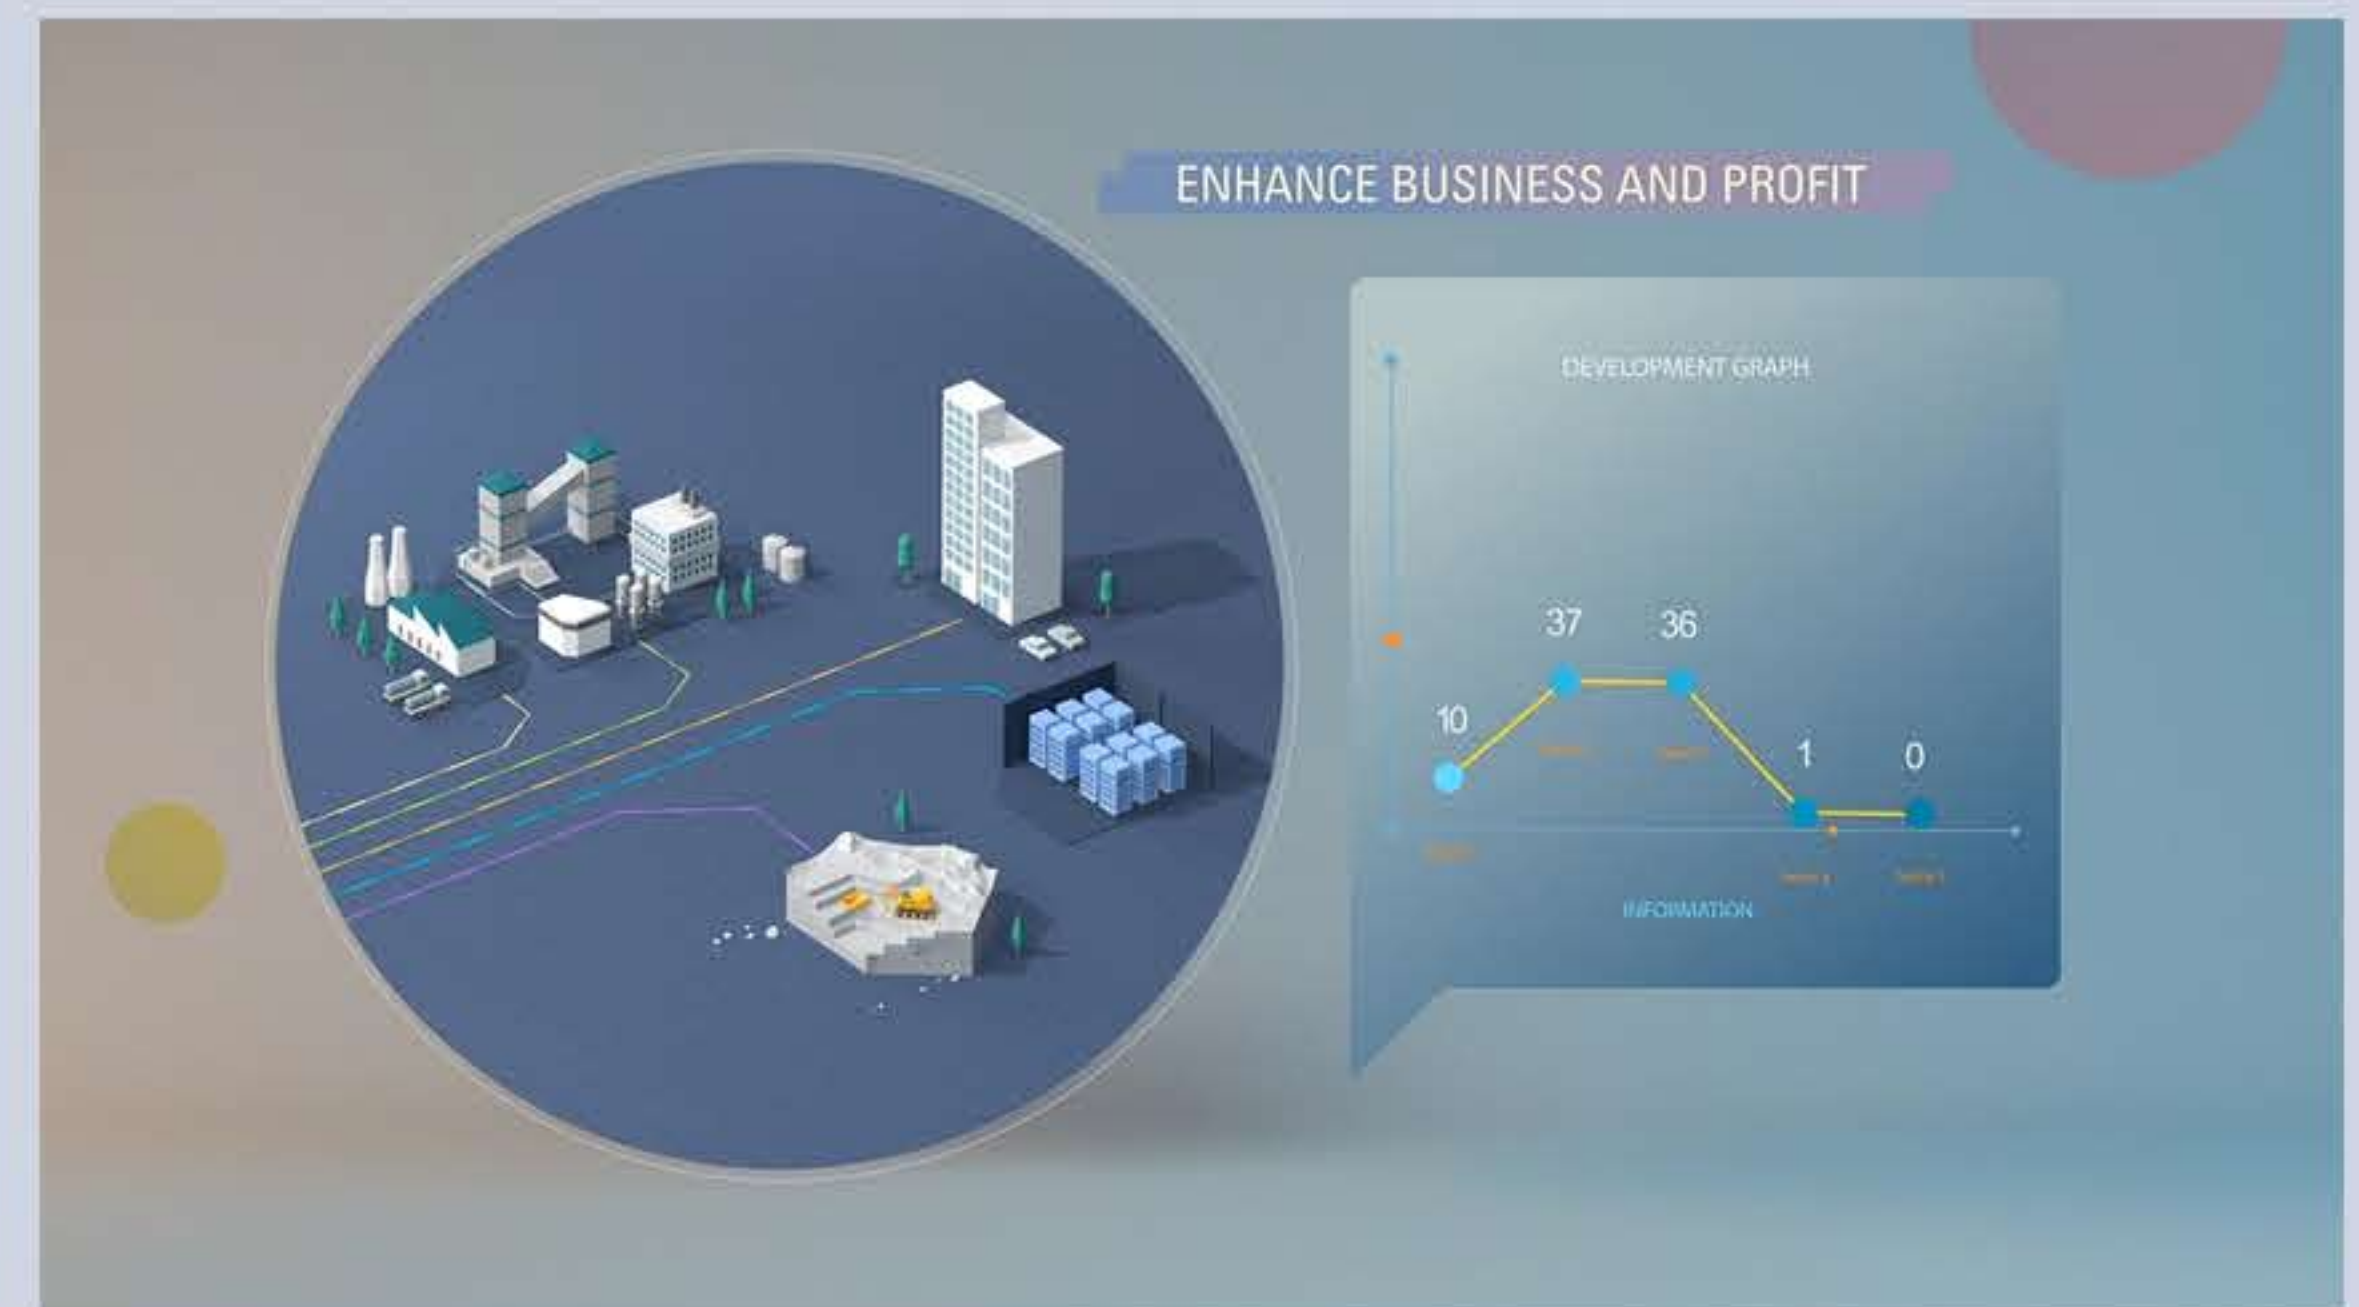

Many customers, such as large commercial and industrial customers, data centers, mining operations, and energy utilities,...

...must find new ways to operate efficiently.

We have the solutions.

Caterpillar can provide power optimization solutionsto support customer business operations...

...while also expanding economic opportunities...

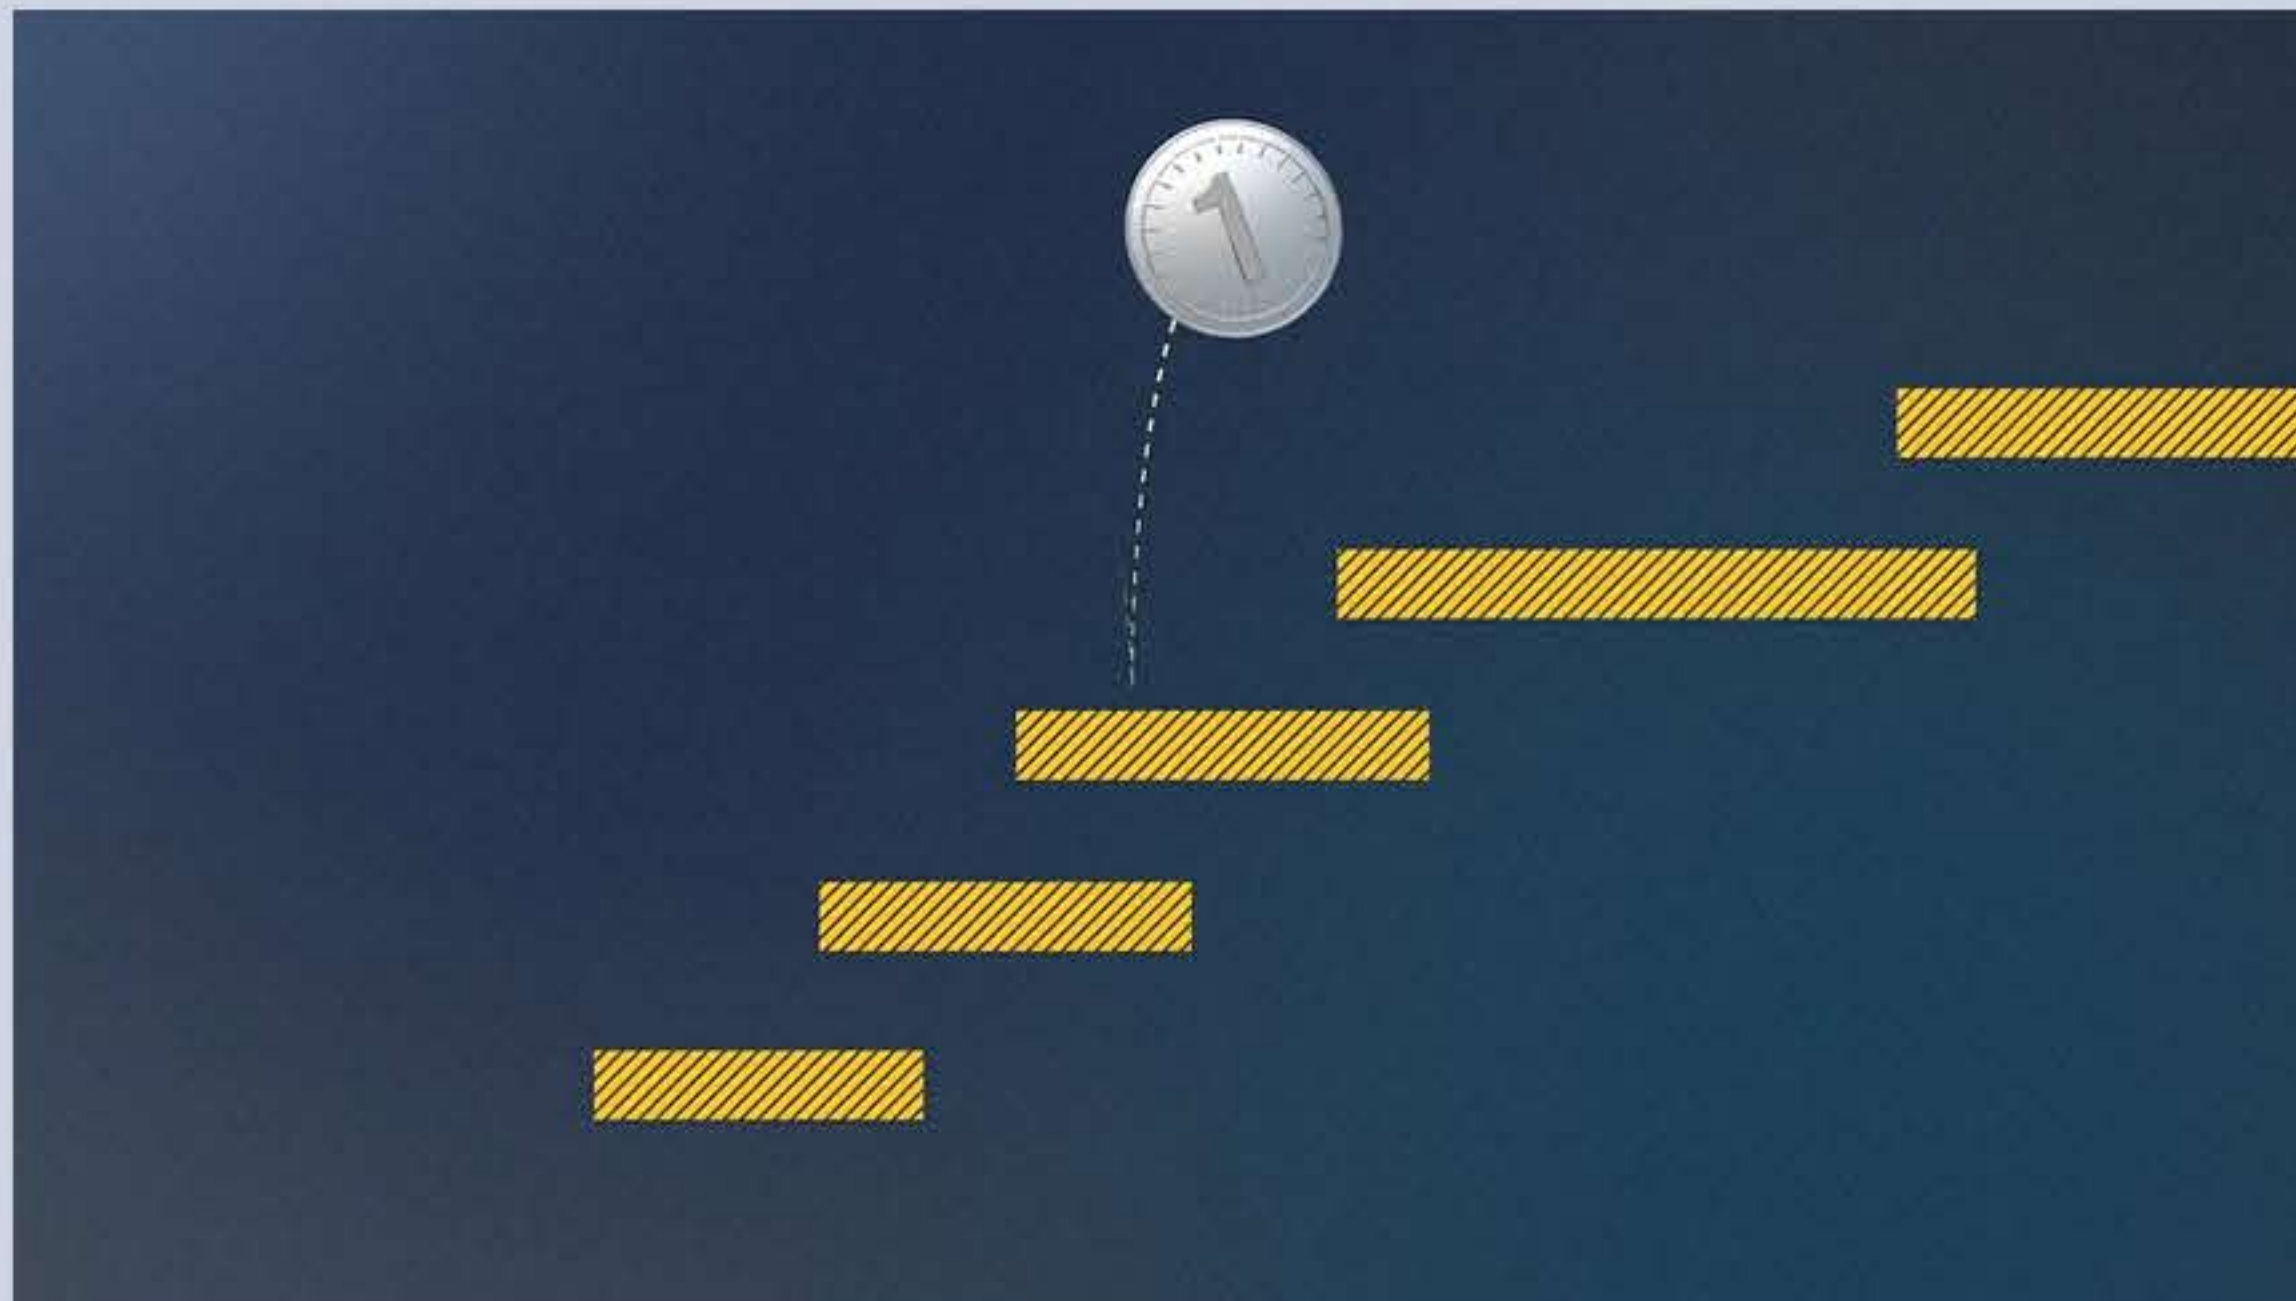

... to transform backup power assets into cost savings.

By analyzing patterns on the grid, Cat A. M. P....

...predicts when power demands that will burden the energy supply...

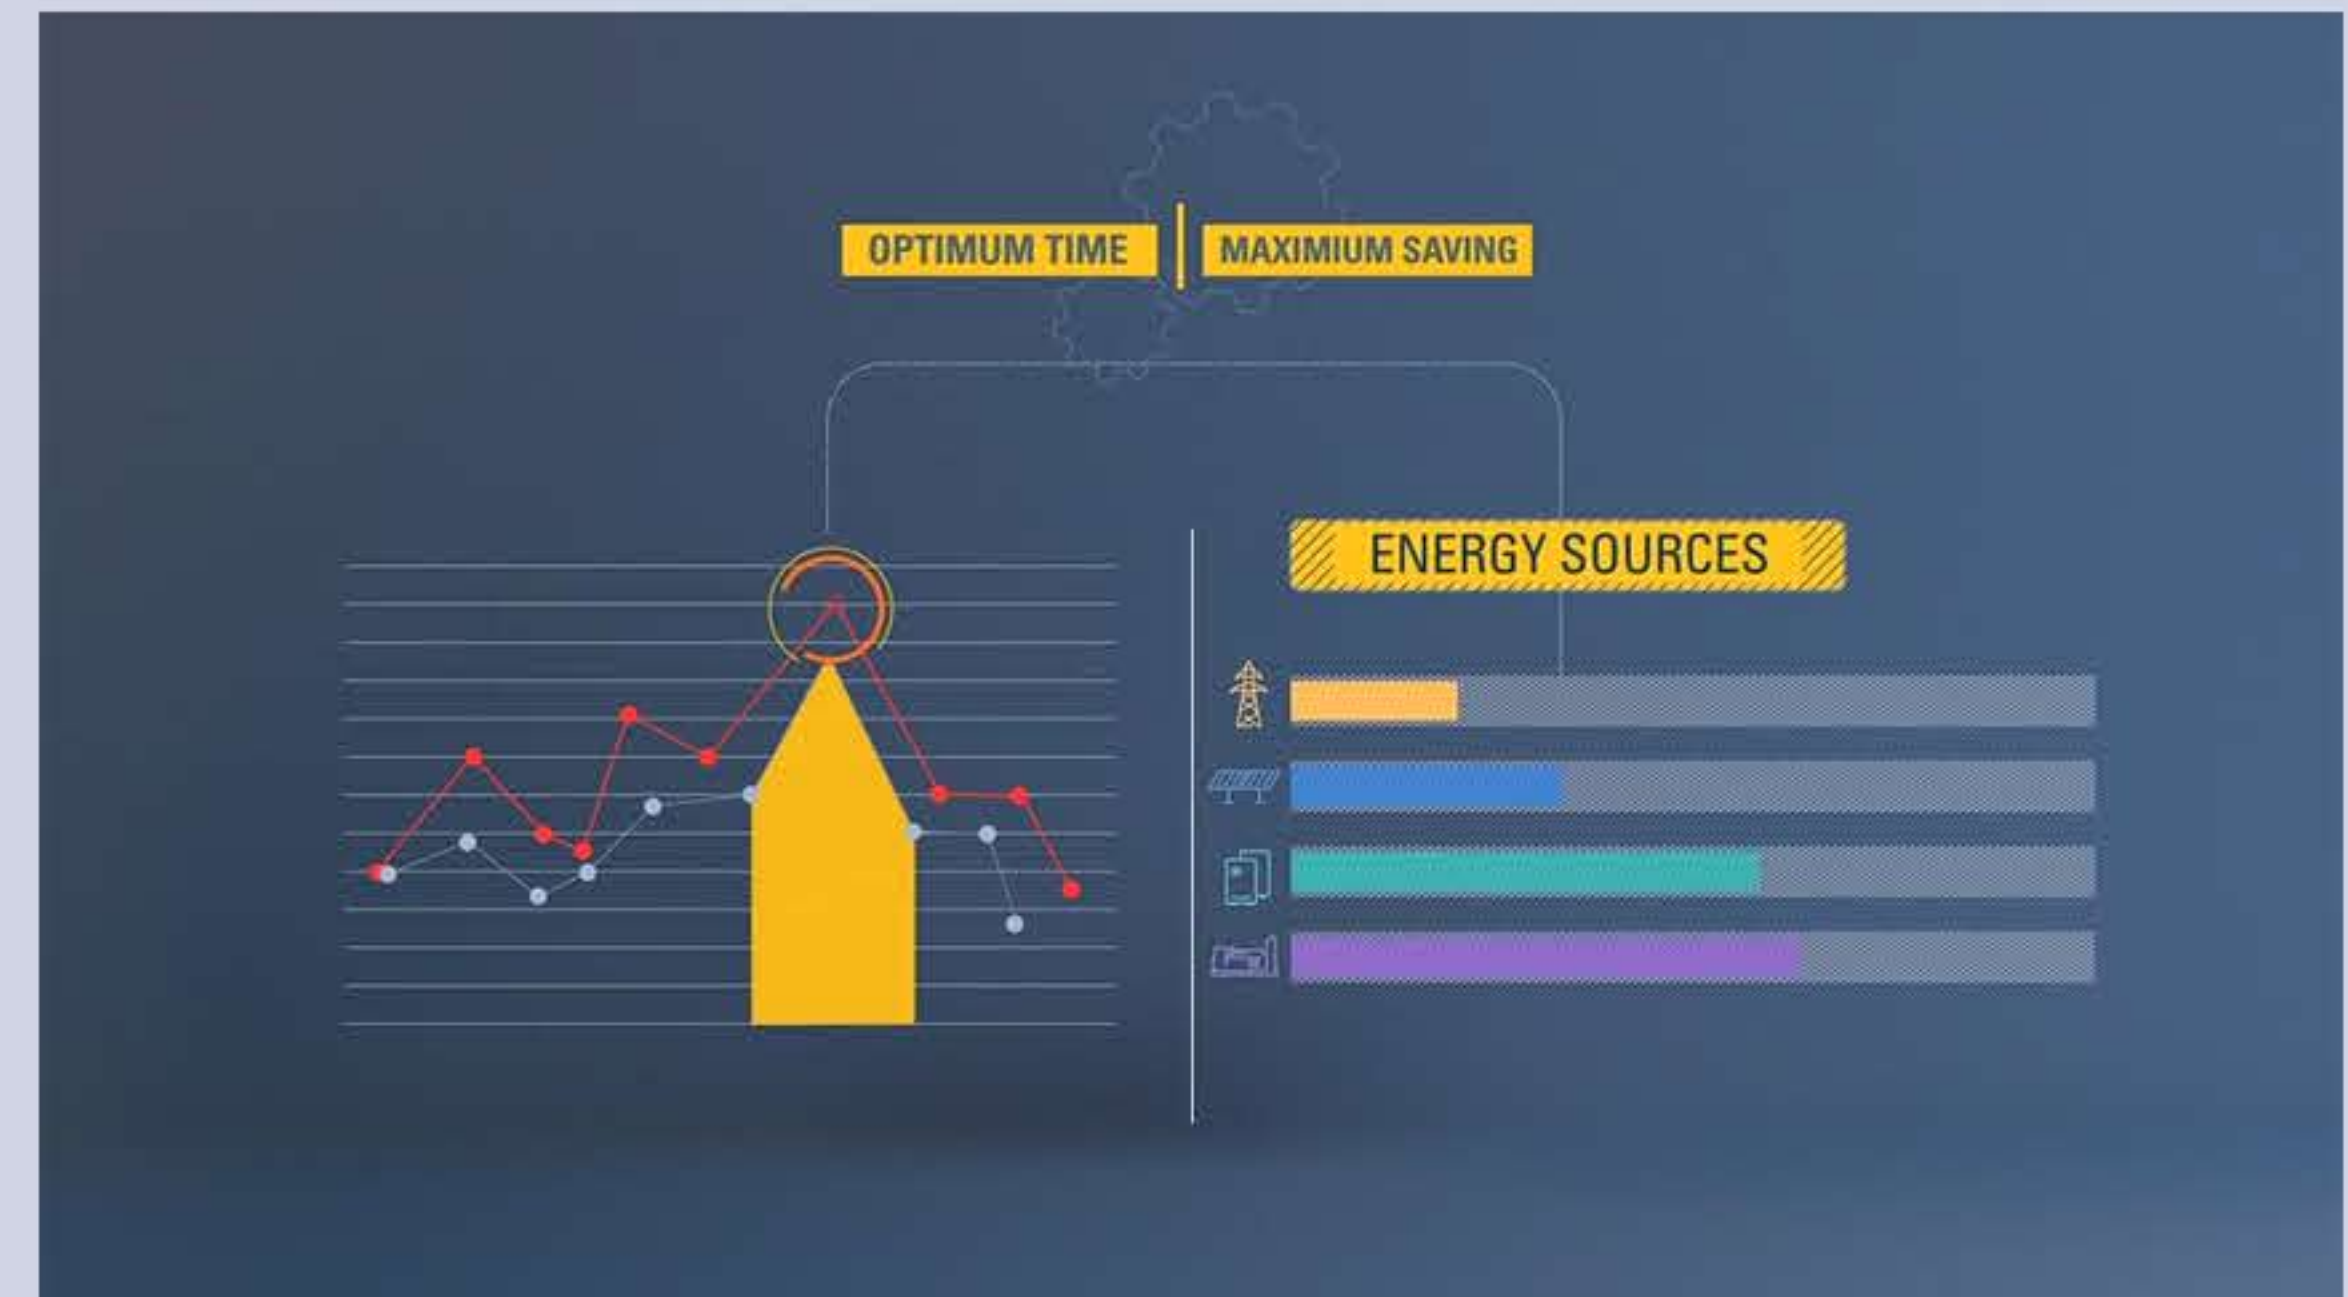

...and drive-up prices.

This proven software holistically manages customers' on-site power generation assets...

...such as low carbon intensity, renewable power generation and energy storage...

...to generate and store energy at optimum times for maximum economic benefits.

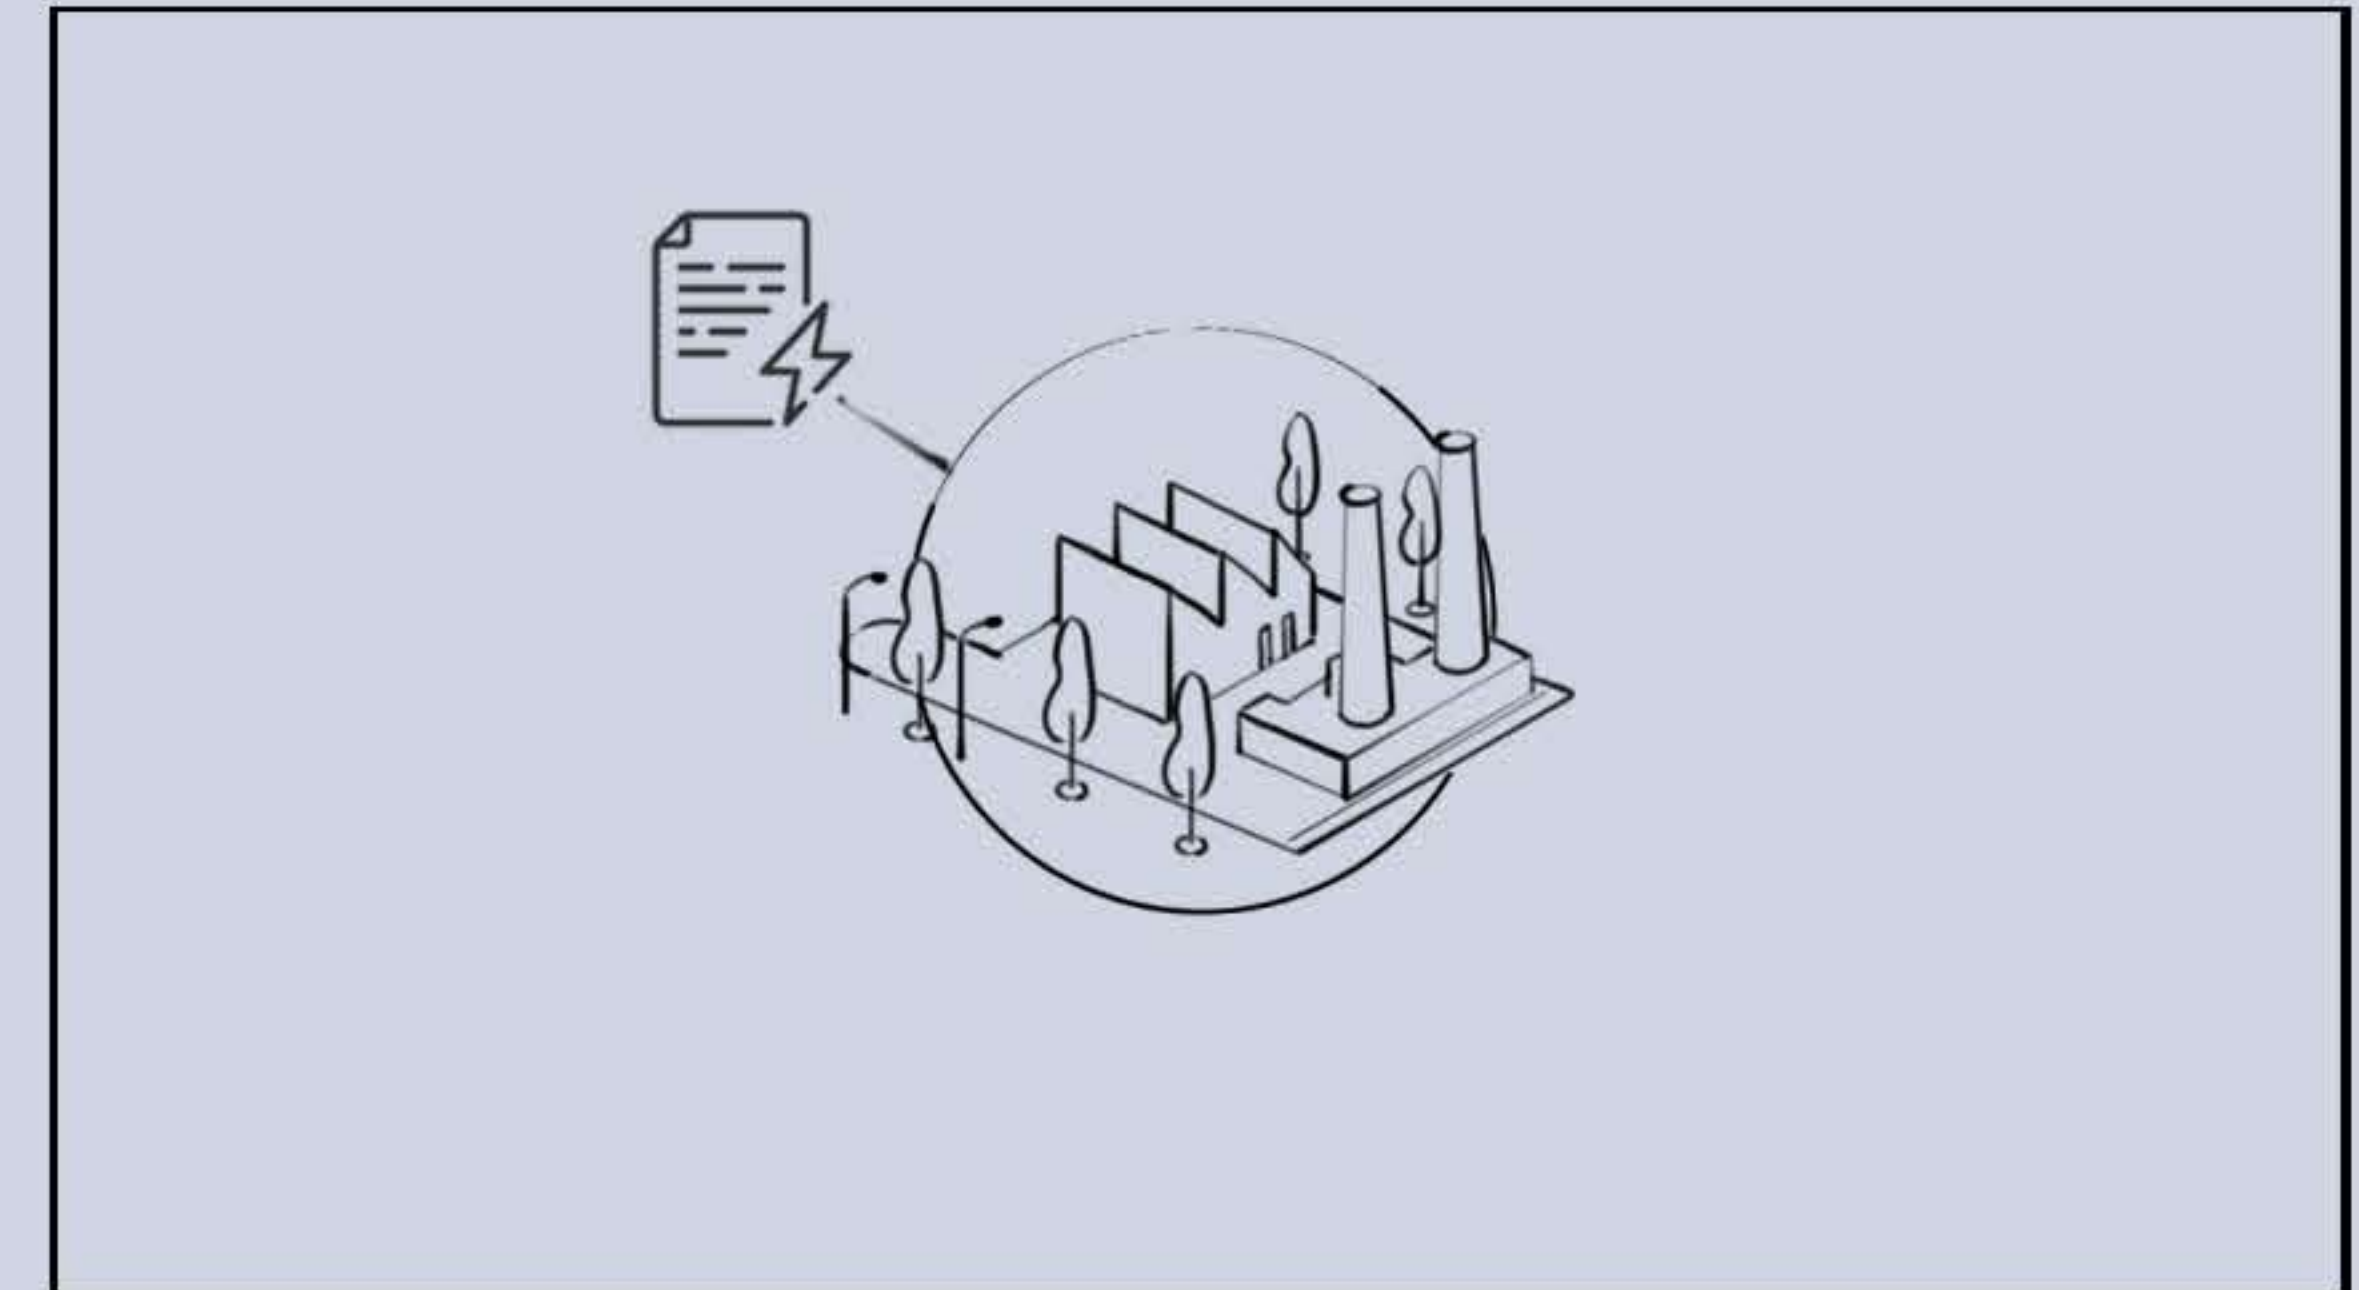

It also predicts opportunities to participate in energy market programs.

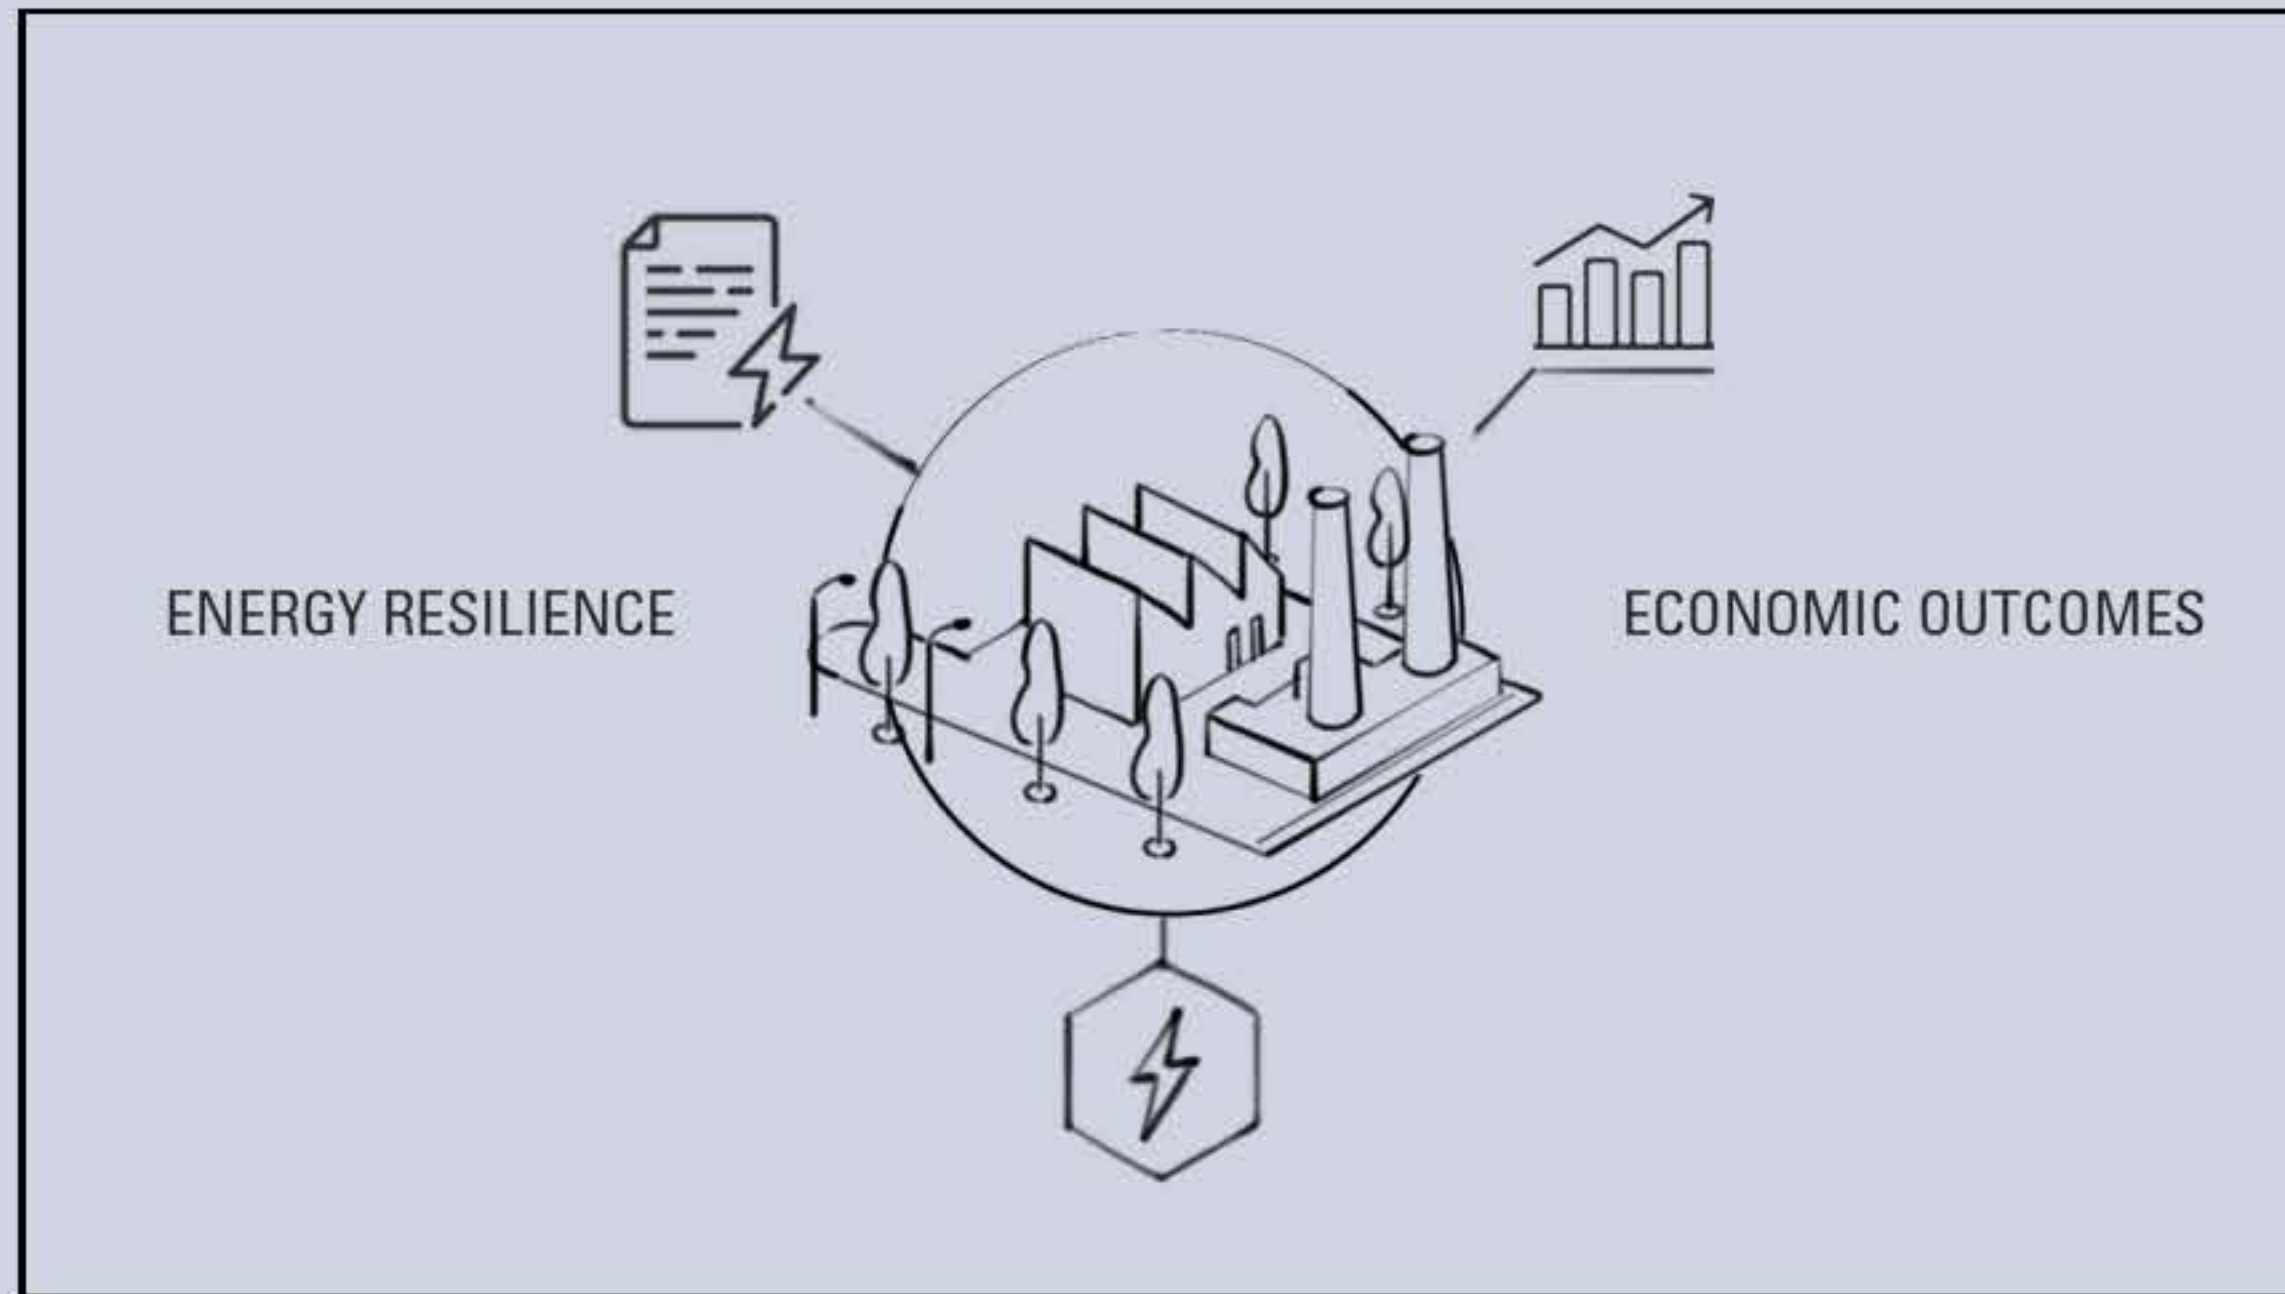

By reducing consumption or operating energy assets behind their meter,...

...customers can receive compensation from energy market operators or utilities.

This solution can also be included in an Energy as a service contract...

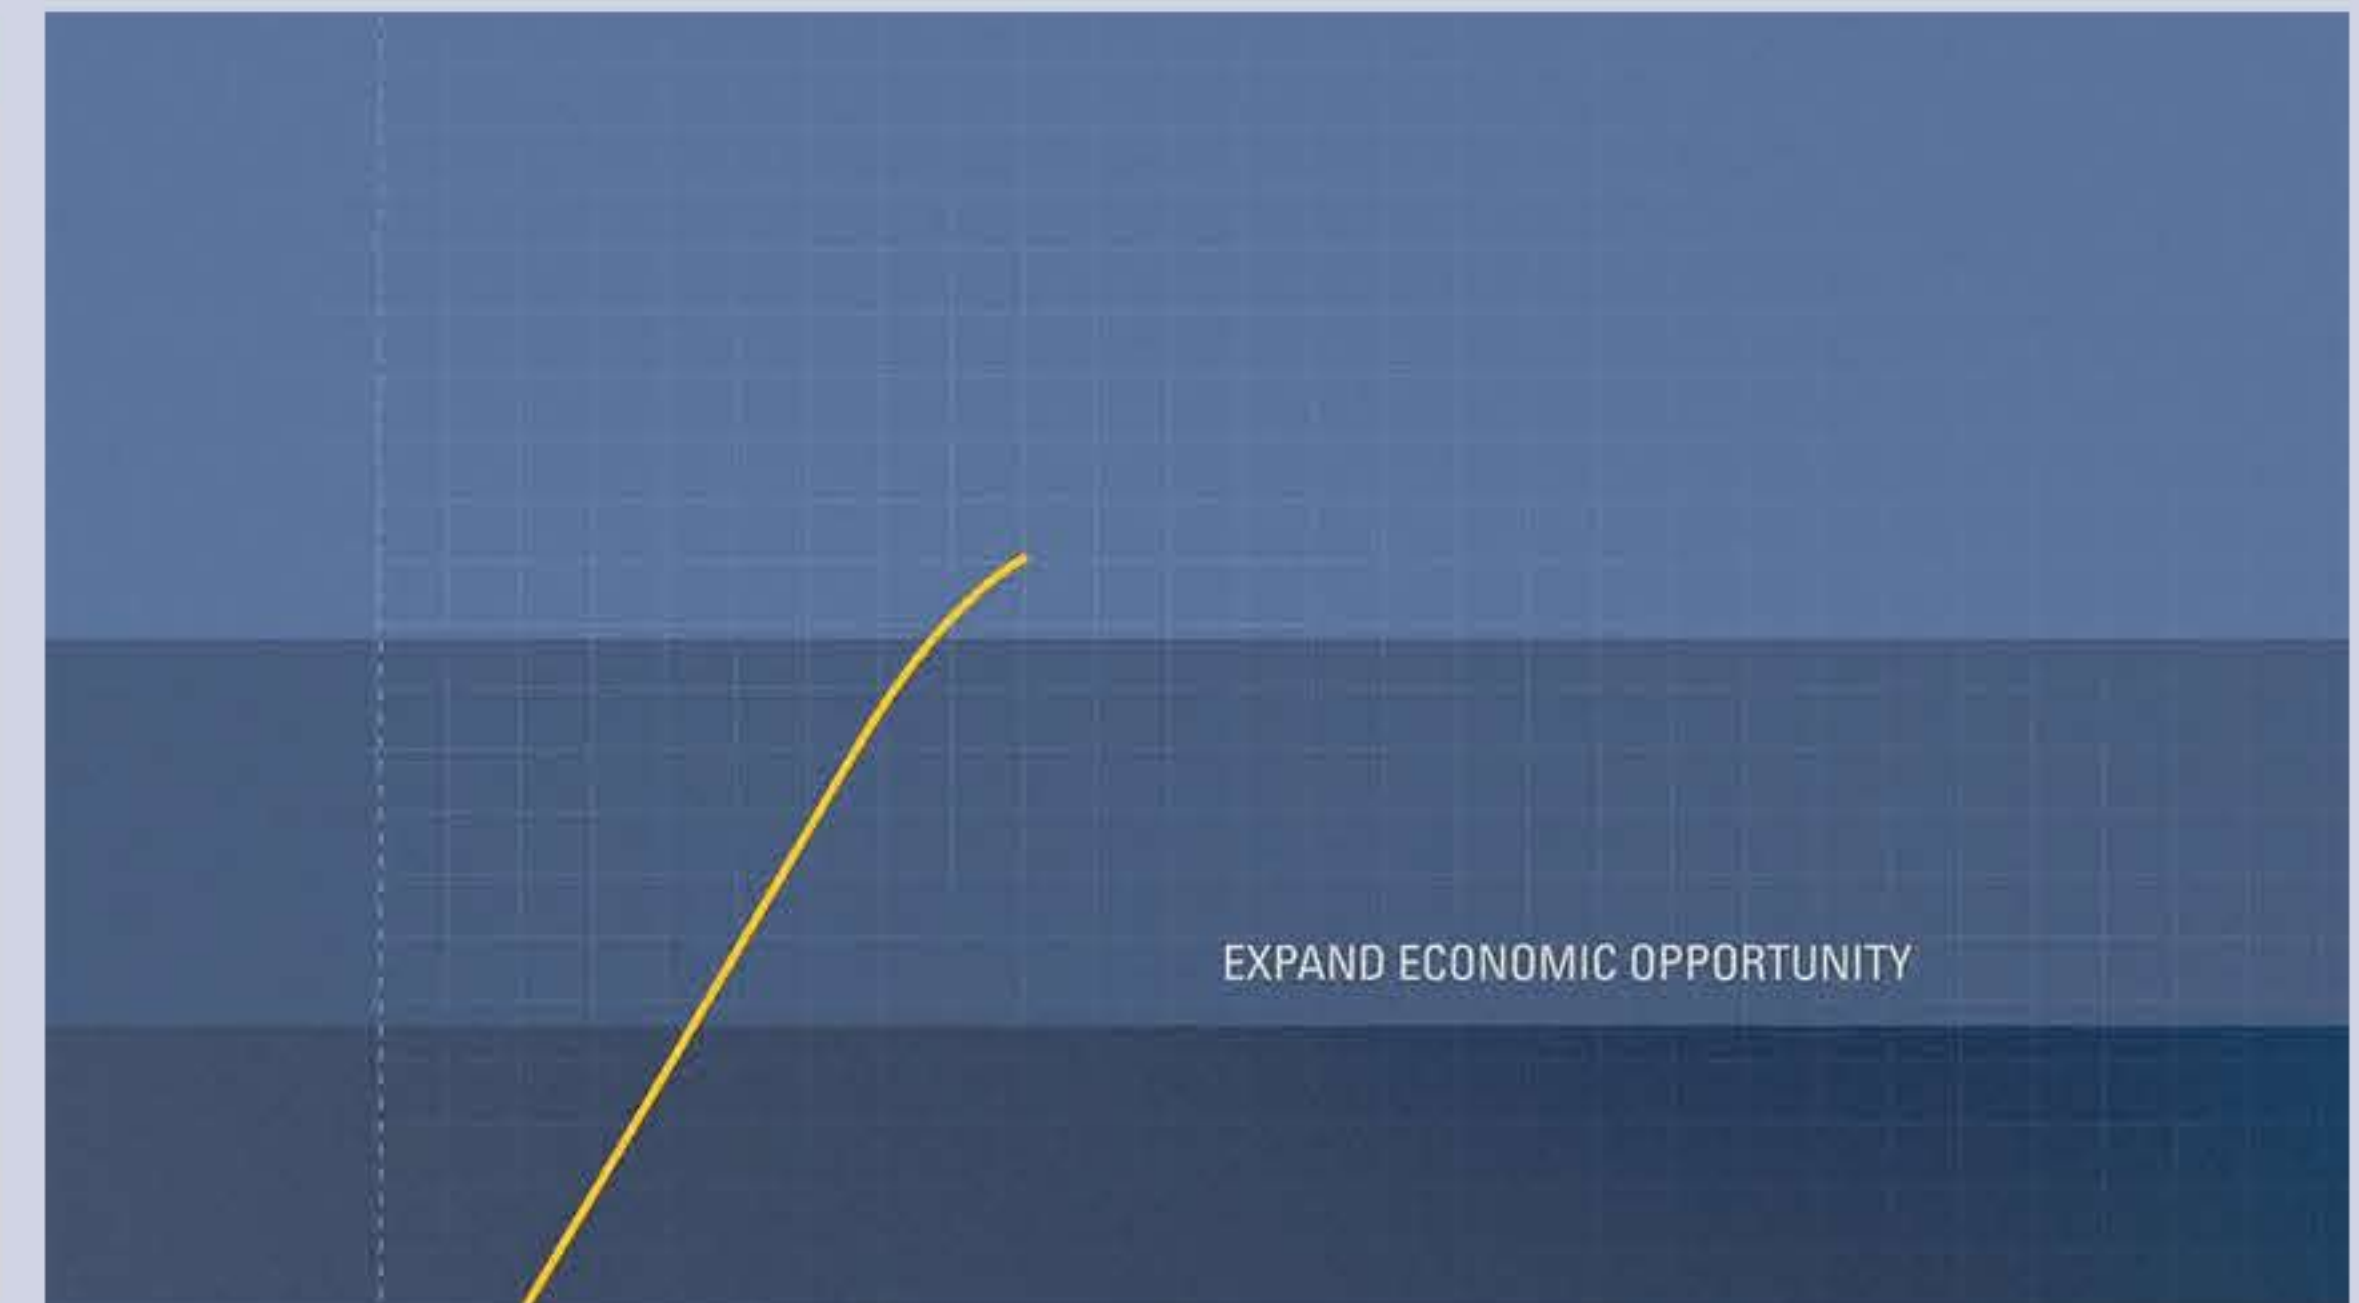

... as a simple way to improve energy resilience and economic outcomes...

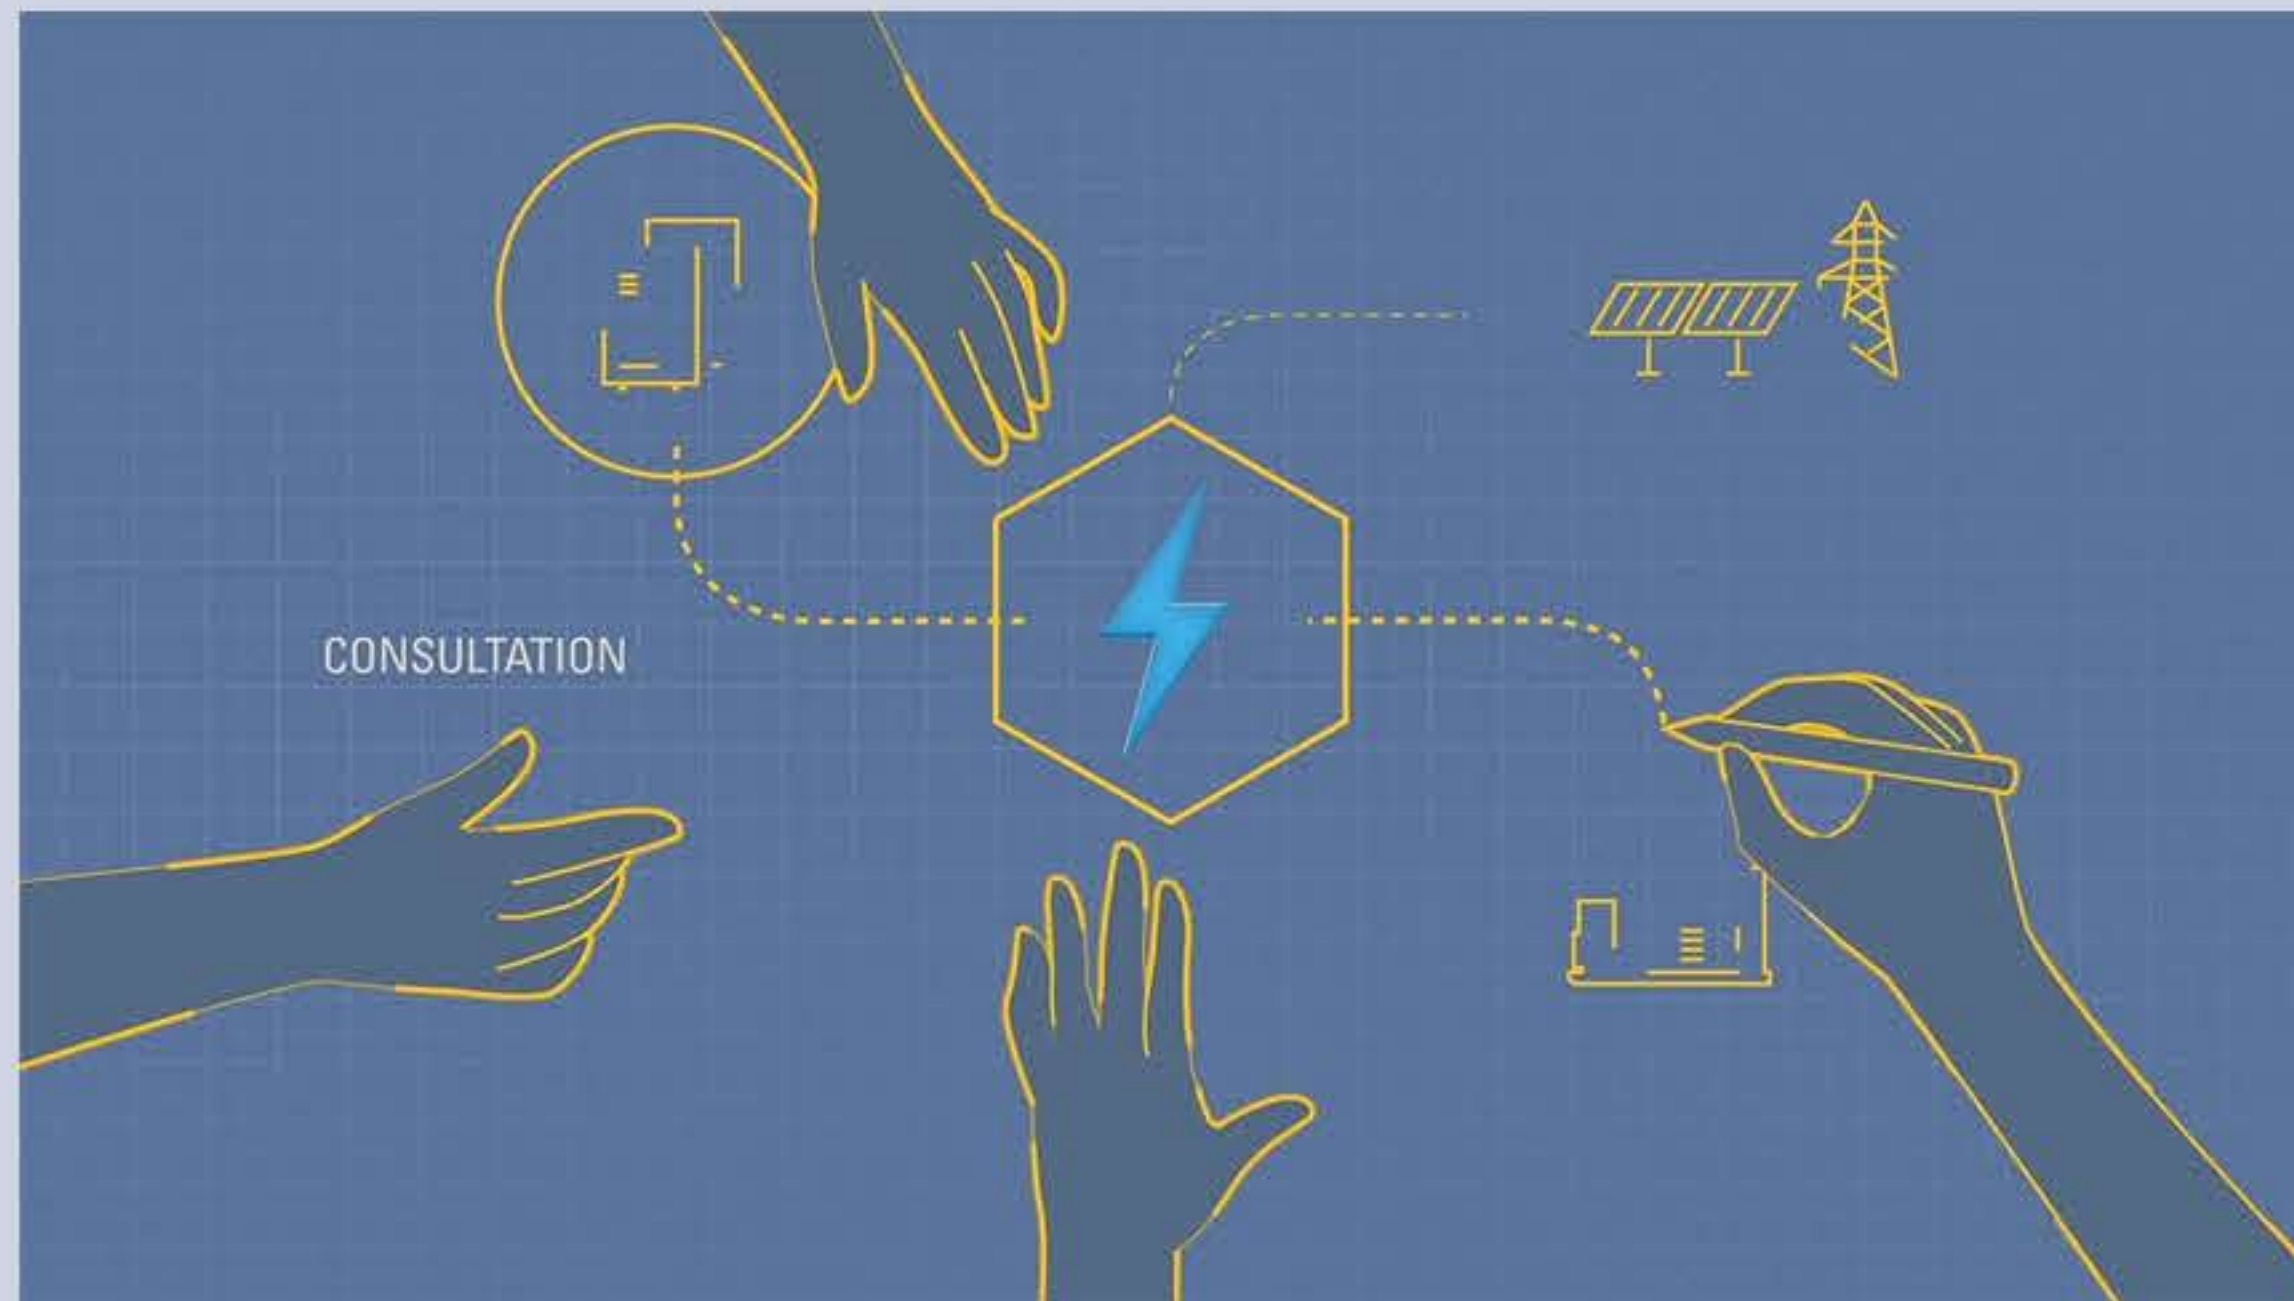

...without capital investment in on-site power assets.

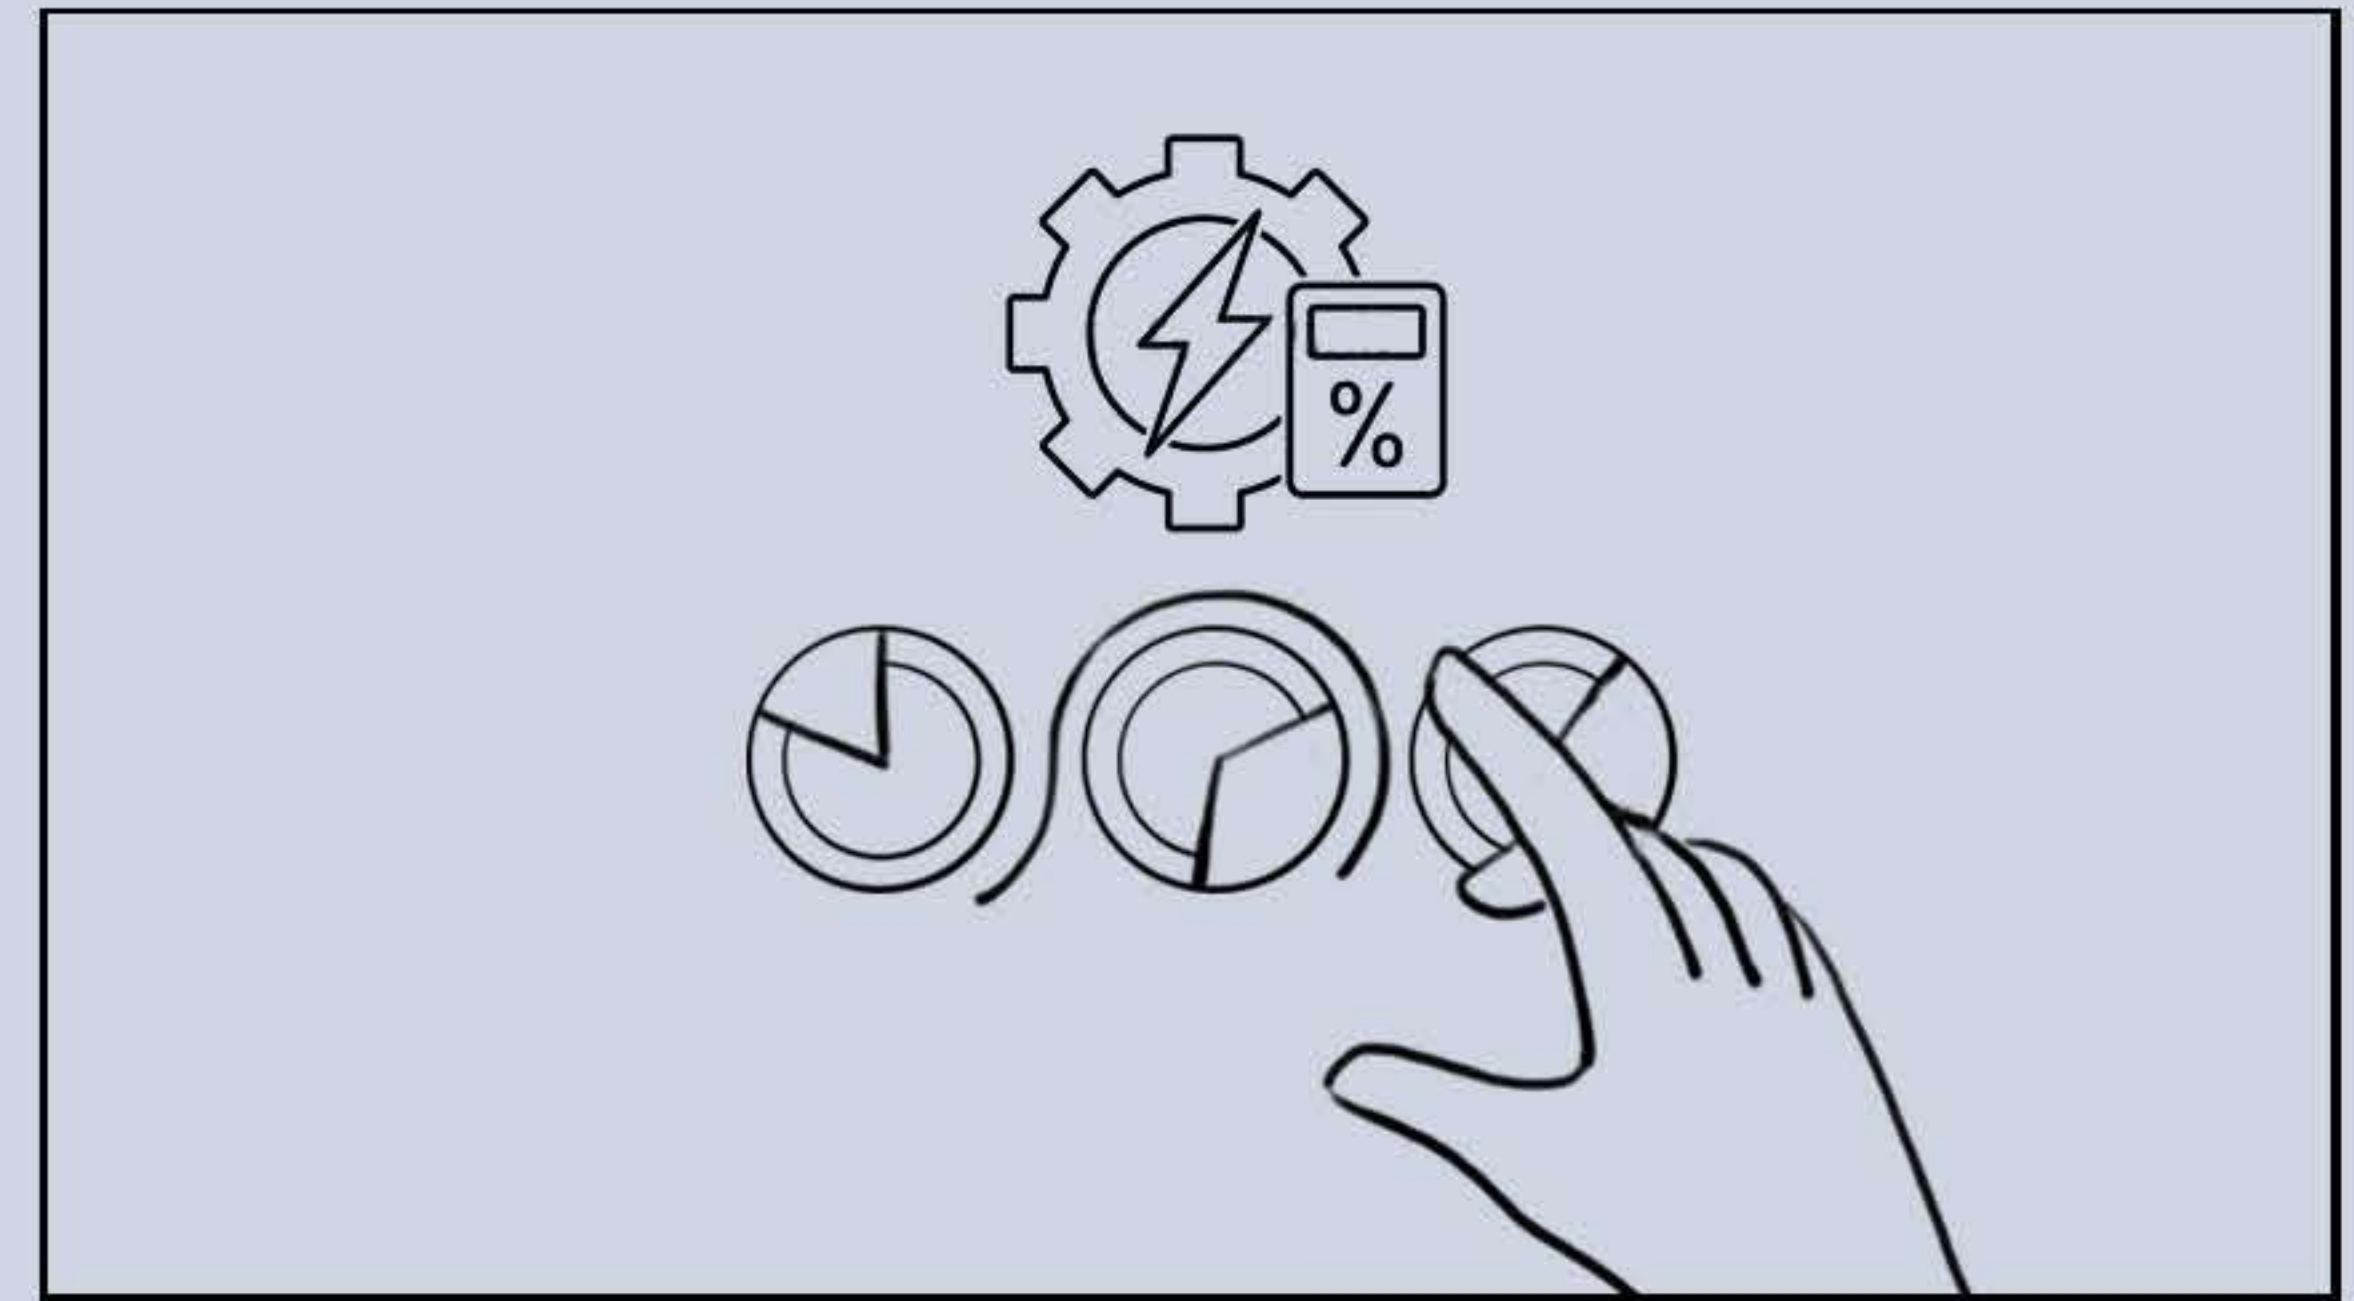

Optimize your operations ...

...and expand economic opportunities.

Our energy experts can meet with you to explore how our Energy Services can help you...

....manage your energy costs while providing the reliability you need.

That's power in your hands and added value for you.
